

April 7, 1939.

Dr. Carl D. Voltner,
Central Missouri State Teachers College,
Warrensburg, Missouri.

Dear Carl:

Your recent letter was on my desk this morning and I was sorry to hear that the flu bug had caught up with you. I looked more or less in vain for you at Sioux City.

We are having the swimming pool material sent to you from the Division of Sanitation, State Board of Health. The dates of the conference are officially April 21 and 22. If you and Marge can come over I am sure that the bunking situation can be worked out satisfactorily. We shall look forward to seeing you at that time.

My angle of the book seems to be coming about the same as yours.

With best wishes for a speedy recovery.

Very truly yours,

V. W. Lapp,
Asst. Professor, Physical Education.
