

March 15, 1944.

Mr. F. B. Toalson, Principal,
Dodge City Senior High School,
Dodge City, Kansas.

Dear Mr. Toalson:

On November 24, 1937, Professor F. A. Russell of our Civil Engineering Department, gave us an estimate on the approximate cost of building one reinforced concrete tennis court. This estimate was based on plans and specifications of the Portland Cement Association and was in line with the suggestions of Junior Coen, one of the Davis Cup members.

I would suggest that you write the Portland Cement Association, 33 West Grand Avenue, Chicago, Illinois. They have rather an elaborate description and drawings of tennis court construction. The brochure they mailed us was dated February 7, 1938, but I am sure they have made improvements since then.

We planned on reinforced concrete, 120 feet long by 56 feet wide, and 5 inches thick, reinforced with wire mesh. The total cost of material was \$976.20. I believe you will get a better estimate from them than it would be possible for us to give because they are specialists in that field.

With all good wishes, I am

Very sincerely yours,

Director of Physical Education,
Varsity Basketball Coach.
