

April 24, 1939.

Mr. H. W. Craig,
Supervisor of Swimming,
University of Illinois,
Urbana, Illinois.

Dear Mr. Craig:

I am very happy to receive your good letter of the 19th concerning the Conference on Public Swimming Pools which was held here at the University on April 21-22.

Professor Earnest Boyce, director of the Division of Sanitation of the State Board of Health, is the "daddy" of this movement. For three years he has been talking to me about having a conference. His plans developed splendidly, and we had a great meeting.

Since you have asked to have the benefit of our conference here I am referring you to Mr. Boyce and asking if he will write you. Mr. Boyce has been in such a splendid position to obtain all the benefits of this meeting that I am very sure he will be happy indeed to write you at an early date so that you may use the information gathered for a similar conference at the University of Illinois on June 6 and 7. Perhaps your department of bacteriology will be able to cooperate with your department of health.

Trusting that you get the desired information, I am

Very cordially yours,

Director of Physical Education,
Varsity Basketball Coach.
