Attention: Dr. F. C. Allen

Dear Dr. Allen:

As you will note, the bacteriological analyses of the pool are much improved, showing no organisms of the coli aerogenes group present at this time. Apparently the chlorination has been effective.

I note your memorandum of November 8 regarding the emergency remedial work that might be undertaken. I am wondering if this emergency work might go so far as to include the replacing of the sand in the pressure filter and the regrading of the gravel, as well as the repair of the chlorinator, if such repair is necessary.

I shall be glad to meet with you and discuss this matter at any time.

Very truly yours,

DIVISION OF SANITATION

Earnest Boyce
Engineer and Director
