

CONFERENCE PROGRAMS

THE New York University Center for Safety Education will provide the services of five members of its staff for one- or two-day conferences in colleges or universities located in various sections of the country which are concerned with the training of teachers, supervisors, principals, and administrators in the general field of education. The members of the staff who will serve as conference leaders are experienced instructors at the Center.

The nature of the conferences held in each institution will depend largely upon the individual college or university. Usually there is an opportunity to devote a general assembly to the subject of safety education.

Conferences may also be held as part of the regular classes in such subjects as the following:

PHYSICAL EDUCATION AND HEALTH
EDUCATIONAL PSYCHOLOGY
TEACHING METHODS
CURRICULUM SUBJECTS

ADMINISTRATION AND SUPERVISION
EDUCATIONAL SOCIOLOGY
CURRICULUM CONSTRUCTION
VISUAL AIDS

Informal conferences may be arranged with groups of teachers or students.

SUGGESTED CONFERENCE SUBJECTS

FOR ASSEMBLIES

Opportunities for Teaching Accident Prevention in the School

Educating for Safety

FOR CLASSES AND GROUP CONFERENCES

The Underlying Philosophy of Safety Education

What is meant by safety education? Upon what bases should a program of safety education be built?

Accident Reporting

What is an accident? What should be included in an accident report? What is the Student Accident Reporting System? What is the value of accident reporting?

The Place of Safety Education in the Curriculum

How important is safety education? Should safety be integrated with other subjects or should separate periods be devoted to it?

Safety as an Integrated Subject

With what subjects may safety be integrated? How? What is the value of such integration?

A Safety Education Program

How may it be organized? What phases of safety should be included? Who should be responsible?

Methods of Teaching Safety

What are the most effective methods of teaching safety today?

Materials for Teaching Safety

What materials are available? Where may they be obtained?

The Use of Visual Aids in a Safety Education Program

Homemade slides. Sound motion pictures. Lantern slides. Film strips.

The work of the New York University Center for Safety Education is made possible by a grant from the National Conservation Bureau, accident-prevention division of the Association of Casualty and Surety Executives.
