

All teacher education institutions were contacted for suggestions, convention committee personnel, etc.

- D. To sponsor definite plans for student participation in social activities at the National Convention

This was done in conjunction with ~~the~~ the directly above.

IV. Student Interest and Growth

- A. Increased student participation in A.A.H.P.E.R.

1. All of the items mentioned above should be effective in the promotion of this.
2. A student section in the Journal was initiated through the cooperation of the editors of this publication.
3. Plans underway to organize a national student section and thus make them really active in Association affairs.

- B. To motivate higher standards of professional growth, etc.

The Committee felt that this would come about best through institutions themselves raising their standards and stimulating the interest of students in their profession. In reply to the questionnaires, the answer has been again and again to have the faculty alert and interested in all professional matters and students will follow.

D. Recommendations of Committee to the Board of Directors

Throughout the work of this Committee the consensus of opinion has been that in order to have students actively interested in the A.A.H.P.E.R. the students themselves must take an active part. With the organization of a National Student Section at the coming convention this idea becomes a reality. The functions of this Committee can to a great extent be carried on by them. With the guidance of the faculty member who sponsors this section, the students can proceed with the reports and summaries made by this Committee when these are made available to them at that time. The files of this Committee will be at the disposal of the Board of Directors.

Respectfully submitted,

Virginia Bourquardez, Chairman
