

August 3, 1944.

Mr. W. J. McMahon, Plant Superintendent,
Wilson and Company,
Adams & Osage Streets,
Kansas City, Kansas.

Dear Mr. McMahon:

I am in receipt of a letter from Dr. Lloyd L. Boughton, Director of Research for the Cramer Chemical Company, who stated that you had informed him of vacancies in your department during Christmas vacation.

Our University, like all other schools, is rather depleted of male enrollment. We have some, and if you will tell me your needs I will be very happy to cooperate in every possible way in aiding you in your splendid war work.

I have always felt that the energies of athletic directors and physical directors should be directed toward winning the war as quickly as possible rather than turning out big time teams during this period. Therefore, I have spent most of my energies in that direction. At the present time I am secretary of the local Selective Service Board, and last fall I headed up the Douglas County War Fund drive. I did also have the job of lining up the display and program for the Fifth War Bond Rally which was held in Haskell Stadium. We were much indebted to your Mr. George Stern for his untiring efforts in making our bond rally a success, and for the wonderful demonstration of the Six-Horse Hitch Clydesdales and the Victory Bond Wagon.

Very sincerely yours,

FCA:AH

Director of Physical Education,
Varsity Basketball Coach.
