

Modern science, which is a by-product and an essential part of the people's revolution, has made it technologically possible to see that all of the people of the world get enough to eat. Half in fun and half seriously, I said the other day to Madame Litvinoff: "The object of this war is to make sure that everybody in the world has the privilege of drinking a quart of milk a day." She replied: "Yes, even half a pint." The peace must mean a better standard of living for the common man, not merely in the United States and England, but also in India, Russia, China and Latin America -- not merely in the United Nations, but also in Germany and Italy and Japan.

Some have spoken of the "American Century." I say that the century on which we are entering -- the century which will come out of this war -- can be and must be the century of the common man. Perhaps it will be America's opportunity to suggest the freedoms and duties by which the common man must live. Everywhere the common man must learn to build his own industries with his own hands in a practical fashion. Everywhere the common man must learn to increase his productivity so that he and his children can eventually pay to the world community all that they have received. No nation will have the God-given right to exploit other nations. Older nations will have the privilege to help younger nations get started on the path to industrialization, but there must be neither military nor economic imperialism. The methods of the nineteenth century will not work in the people's century which is now about to begin. India, China, and Latin America have a tremendous stake in the people's century. As their masses learn to read and write, and as they become productive mechanics, their standard of living will double and treble. Modern science, when devoted whole-heartedly to the general
