

Ammonia Inhalants

This is a handy and efficient method for carrying and administering Aromatic Spirits of Ammonia; no waste; no spilling. The package consists of ten sealed glass capsules, surrounded by cotton, and enclosed in a silken netting. When required for use simple pressure between the fingers breaks the capsule and saturates the surrounding cotton with fresh ammonia. These

inhalants are especially useful in cases of unconsciousness due to fainting, shock or collapse.

Ten (10) inhalants per pkg.—Price, \$.30

Iodine Applicators

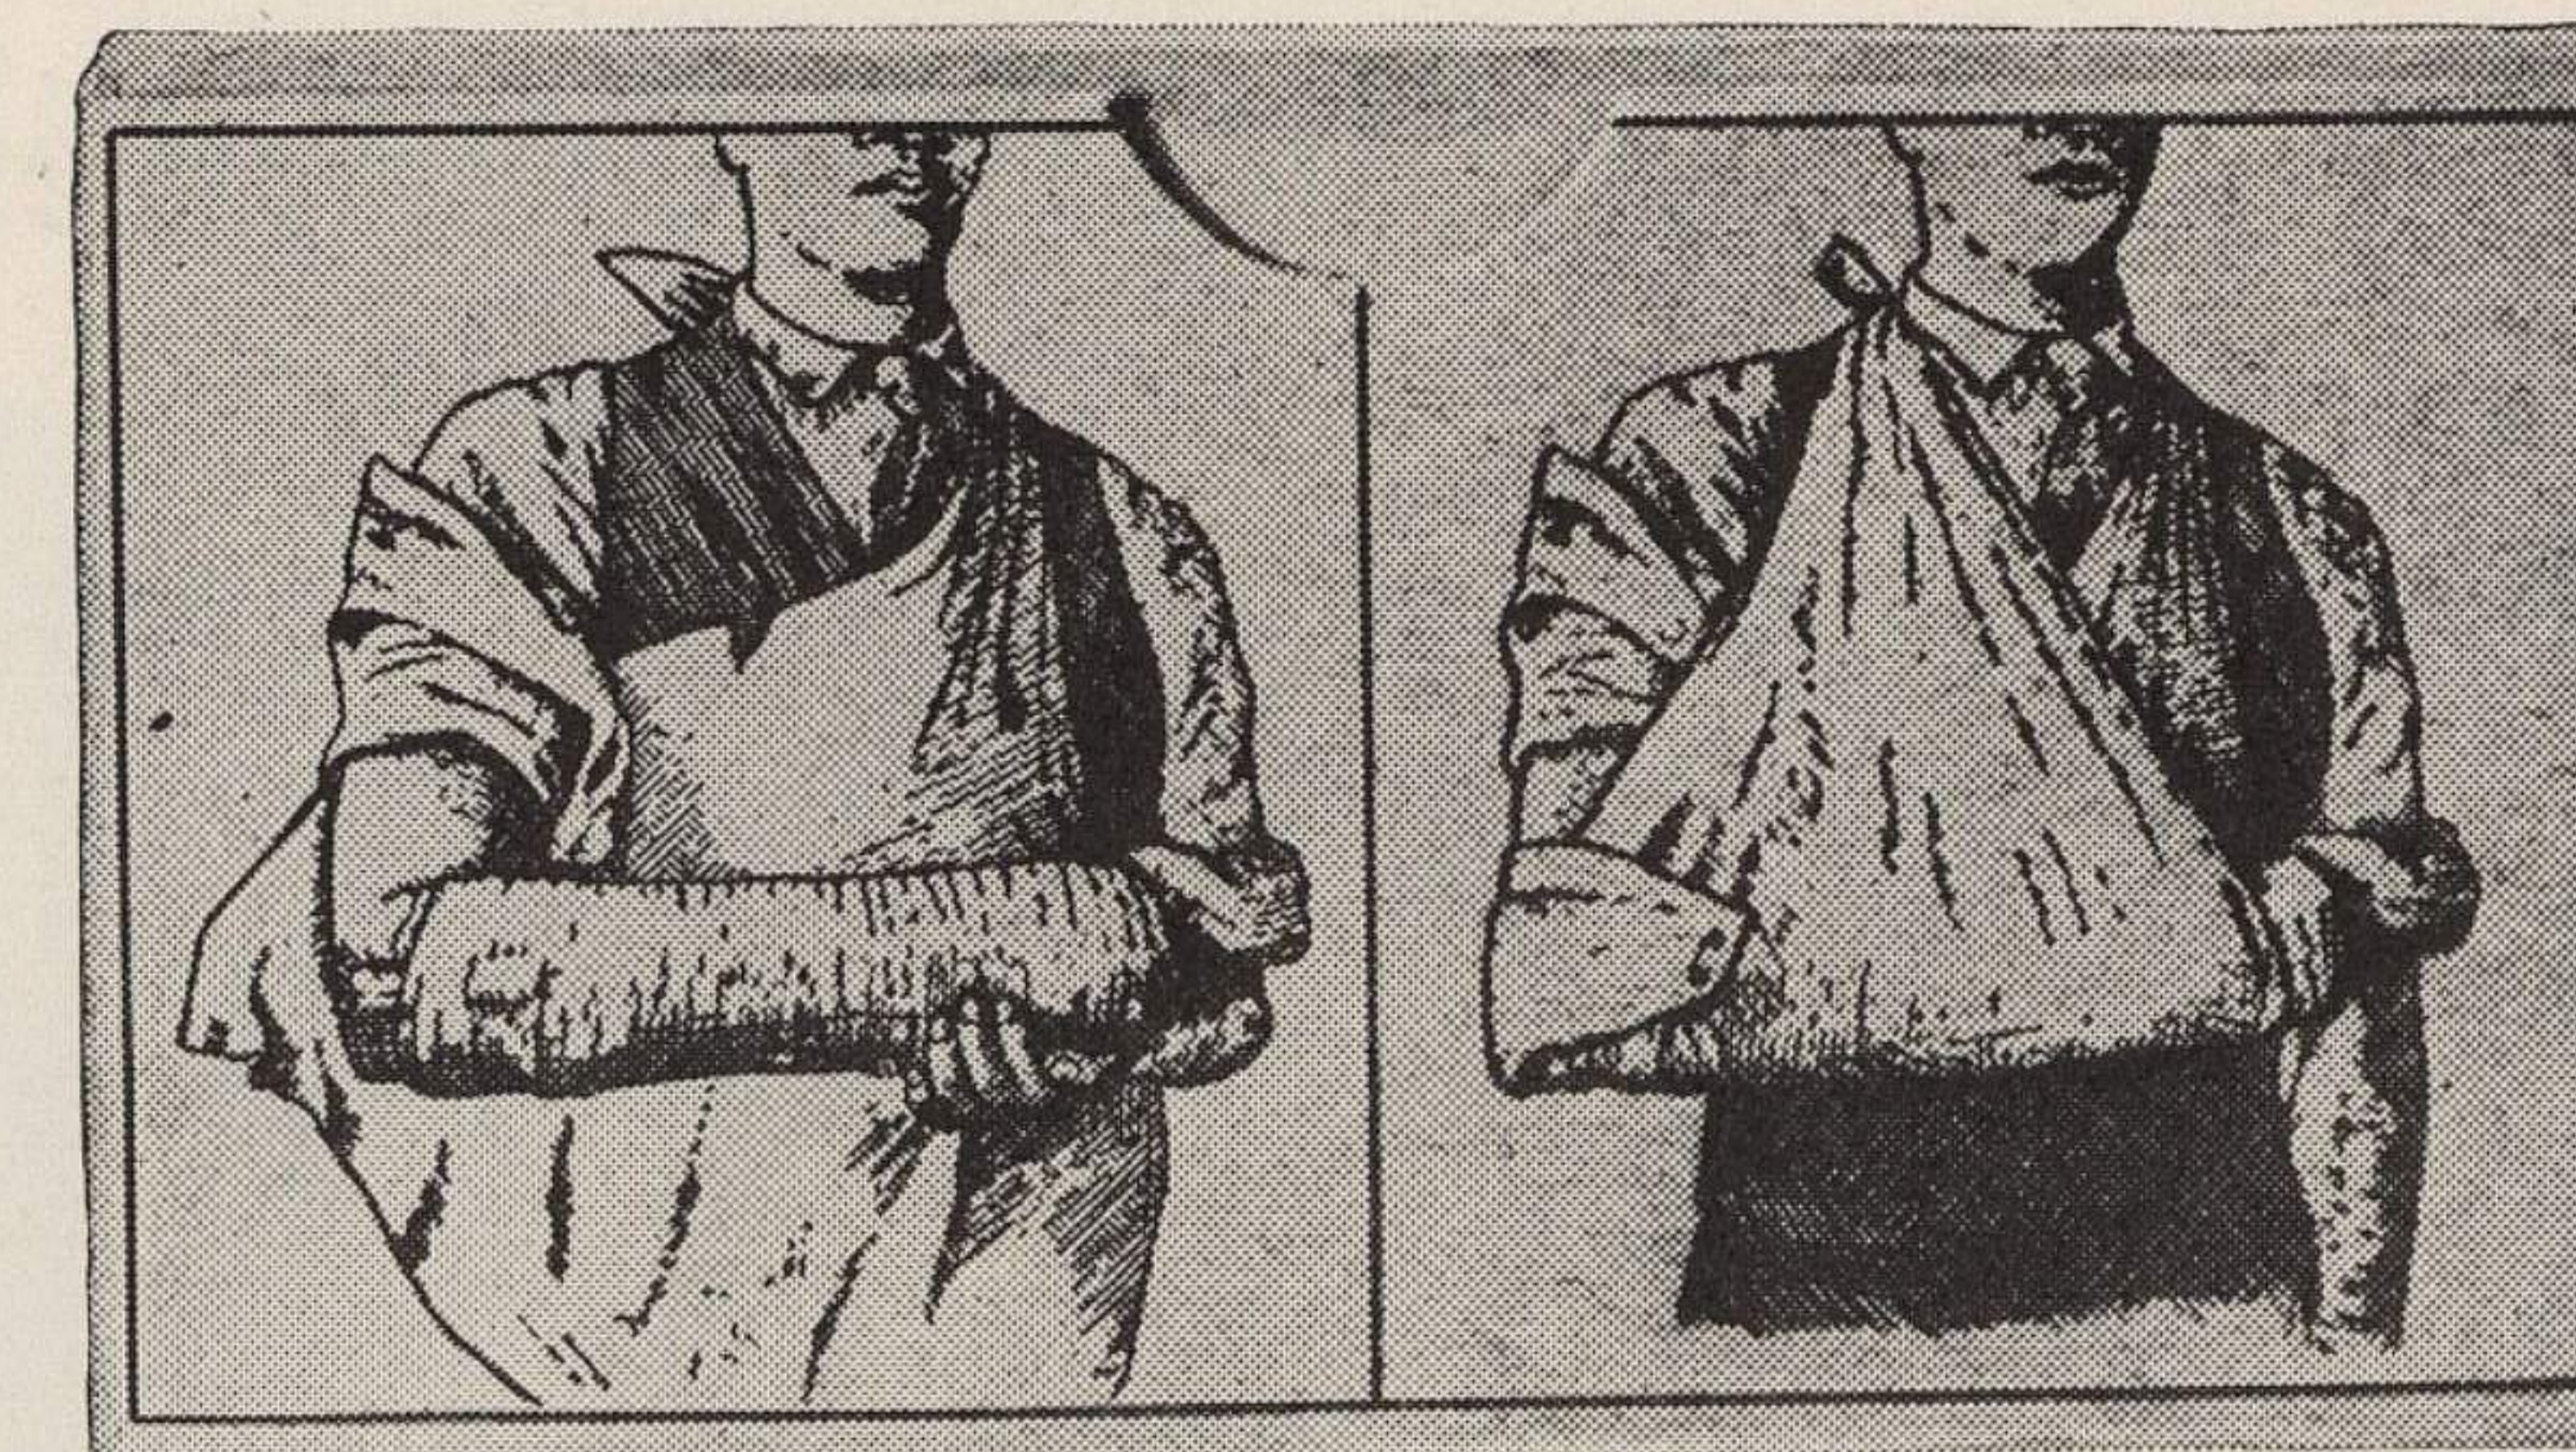

These applicators are for use in treating small wounds. Each applicator vial contains 10c.c. 3½% iodine. Remove cap, invert vial and apply to wound. When a greater quantity of iodine is desired tap the bottom of the vial.

3 Applicators per pkg.—Price, \$.40

Triangular Bandage

This sterilized 40-inch compressed muslin bandage is folded in cravat form, so no time is wasted in opening and refolding.

It is ready for immediate use when taken from the package and is indispensable in a first aid kit. It may be used as a sling, for securing splints, or for holding compresses or bandages in place.

Price per pkg., \$.18

Bandage Compress

This convenient bandage consists of a sterile-gauze pad sewed to a gauze bandage of full width and folded in such a manner that the pad may be placed over the injury without danger of contamination. The pad can be quickly opened out to twice its normal size when the nature of the injury requires it. The full-width gauze bandage holds the pad firmly and neatly in place over the wound, with uniform pressure.

2-inch Bandage Compress (2 per pkg.), Price, \$.15

3-inch Bandage Compress (2 per pkg.), Price, \$.24

4-inch Bandage Compress (1 per pkg.), Price, \$.15
