In our discussion groups relating to Physical Education, many are interested to know how the larger institutions feel in relation to the present trends in Physical Education.

If time will permit, will you please write me a paragraph, telling me your personal opinion as to the present trend or direction of Physical Education in your area?

I would also like a copy of your Physical Education Curriculum if you would care to send me one.

I know you are an extremely busy, but will appreciate any consideration you can give me.

Very sincerely yours,
