Prof. F. C. Allen  
107 Robinson Gym  
University of Kansas  
Lawrence, Kansas

Dear Professor Allen,

We are enclosing two prints showing alternatives in the remodeling of the university swimming pool. The one method uses the existing space. The other method would permit a full size pool but requires considerable work throughout the basement.

Now as to the cost. In the present location, full remodelling, with under-water lights acoustical ceiling, new filters, and tile work throughout the pool and shower room---\$38,000. This includes underpinning the column and wall footings to the the depth which you require. The other location costs \$47,500, and includes eliminating two columns.

In the first figure, the cost of filters, pool lights and acoustical ceiling amounts to \$8,150; the shower room tile to a \$3,540 additional.

After you have had time to look over the two schemes, we shall be glad to make an appointment, and will await direction as to which method we should proceed upon.

Yours truly,

Charles L. Marshall  
Assistant State Architect
