

October 22, 1941.

Chancellor Deane W. Malott,
University of Kansas.

Dear Chancellor Malott:

I am making a progress report on our meeting with Mr. Finn Jensen and Mr. Sam Anderson regarding the program for skiing on the hill this next winter. We had a fine meeting this morning and you can count on a fulsome program for each day that the snow flies.

I am also working on a program to provide outdoor skating on the intramural field. We expect to string poles and lights down to the field before it freezes. This will be done if and when the flooding scheme that we discussed will prove feasible. You will see that we are asking for no money. That should make everybody happy.

We are also working on the grading of the George O. Foster lot and are planning to install posts and netting there. The incessant rain has made the grading problem a very difficult thing.

Regarding the lawn bowls, I am working with Dean Jakosky to see if we can not have the Engineering School run some levels on the quadrangle without much cost to us. I am speaking of the Department of Physical Education. When we get these levels run we will then be ready for another conference with you, but we will not be asking for money.

Very sincerely yours,

Director of Physical Education and Recreation,
Varsity Basketball and Baseball Coach.
