

He has taught in the summer session at the University of Colorado. Last summer he taught at the University of Missouri, where he received \$800.00 for the summer, and he has signed again for this summer at the University of Missouri. He has already closed for summer work a year from now at the University of Wisconsin.

At San Francisco I had a three-hour conference with Strong Hixson and he said if he could get \$5400.00 or \$3500.00 for a regular yearly salary in this department he would be very happy to come to the University of Kansas, as he saw a great possibility for the growth of physical education at the University. He looks upon Kansas as a focal point of great physical education development in the Middle West. Mr. Hixson is by far the strongest man nationally that we have entertained any hopes of obtaining.

Mr. Kistler has great possibilities of future growth and worth. It is my notion that he would consider coming to Kansas on account of an opportunity that might be presented to him to head up the department in the future.

It is my understanding that Dr. Kistler is about 42 years of age and Mr. Hixson about 44 or 45 years of age.

At Sioux City I also had a conference with Dr. Kennedy, of Kansas City University. He is a very striding gentleman, and as a co-worker in the department I think Dr. Kennedy would do mighty well. However, his age is a little against him as he is 52. He is drawing \$3200.00 at Kansas City University, and as he has an M. D. degree I am rather at a loss to understand why he is working at that low figure. He has had some disappointment with the Municipal University not being able to get together with the Kansas City public school health and physical education situation, so I believe that accounts for one reason that he desires to move.

While on the Pacific Coast I had a conference with John Ann and Dr. Storey of Stanford University. There is only one young man that they have who shows exceptional promise - a Dr. DeGroot, who is at Punhou Academy, Hawaii. John Ann says he is one of the most outstanding young men that he knows. John feels that DeGroot is getting \$2400.00 there in Hawaii, but he would be interested in coming back to the States since he has served two years at Punhou. Punhou Academy is an American college of junior college rank, administered for the wealthy Americans on the Island. A few years ago Punhou Academy ran in the Kansas Relays when they were on their way to Penn. They were a group of fine, upstanding young men.
