

Player D. Center.

Player D was the fourth man on the squad to play over 200 minutes with a total time of 221.5 minutes. He earned 33 score points and 1256 evaluation points, which was fourth high for the squad. While playing he scored 14 goals (28%) and made 5 free throws (62.5%). In ball handling errors he had a low score of 1.9% and was one of the four men to score less than 2% errors. His all around playing efficiency was 94.9%, which was also fourth for the squad. As far as ball handling was concerned, he was third in the total number of passes and catches. He made 17 more passes than catches. There were only four men on the squad that took fewer shots per minute. The data show that this player handled the ball many times for a low error rate of 1.870. He was second on the squad in evaluation points per minute and that shows he did not shoot too often. On playing efficiency he was the best center on the squad, and the players, the coach and the freshmen all rated him as the number four man.

Player E. Forward.

This player was a forward and had 141.5 minutes of playing time to his credit. He earned 560 evaluation points and 25 score points. He scored 10 goals (30.3%) and made 5 free throws (71.4%). In ball handling he had an error rate of 4.6 which was second highest on the squad. From the standpoint of player efficiency he was 12th. There was only one other player on the squad that had a lower rate of personal fouls. Player E played 141.5 minutes or over $3\frac{1}{2}$ games of 40 minutes each and made only 3 personal fouls. He is the first player in the list to catch the ball more than he passed it by 4 catches. He also is the first man on the list to be listed as a forward only. Player B played both forward and center during the season. It seems to be a characteristic of the forward position to demand more catching than passing. The data indicate a low personal foul rate, a poor efficiency rating as compared to the players who played 200 minutes and an error rate in ball handling 4 times as high as that of players A and G. He was rated as sixth by his fellow players and the freshmen, and seventh by the coach.

Player F. Forward.

This player was listed as a forward and he played 117 minutes, making 12 goals (17.9%), and 8 free throws (57.1%). He earned 628 evaluation points and 32 score points. On the player efficiency chart he rated 6th with a percentage of 94.1. His rate of error in ball handling was 2.070, which placed him in fifth place. Like the preceding player, he had more catches than passes in ball handling. Only one other player (H) had more attempted shots per minute of play and only two squad members made a smaller percentage of their shots. On balls recovered off his own backboard he rates as the number one man. This is also true for the recovery of his teammate's jump balls. On the basis of personal fouls per minute, this player ranked 11th for the squad, only two making more than he did. The data indicate that the player was fairly efficient, but that his shooting average was far too low. He makes a first class man on handling rebounds off his own backboard and getting the ball after a teammate's jump, but he committed too many personal fouls. His teammates, freshmen and coach rated him fifth.

Player G. Forward and Guard.

This player was listed as both a forward and a guard. He played 100 minutes, made 460 evaluation points and 10 score points, 4 goals (20.0%), and shot 2 free throws for 50.0%. He earned a rating on player efficiency of 94.2%, which places
