

here, The Bronx - + Boston are also attending.

Under the direction of Dr. Seavers from New York University and the Bellevue hospital we are taking an intensive course in the treatment used here for the more seriously disabled. That is the transverse myelitis cases that seem to be coming to the facilities in larger numbers. —

Dr. Seavers is a wonderful man and has a dandy way of putting it (his ideas) over to us. —

He has cases who have been in wheel chairs for 10 + 19 years before they came to him, up on crutches and braces going about the streets of New York. —
