

February 5, 1945.

Mr. C. R. Allen, President,
Chamber of Commerce,
Lawrence, Kansas.

Dear Rog:

Ogden Jones and I have been conspicuous by our absence at the Chamber of Commerce meetings. A short word of explanation - our Selective Service Board meets every Tuesday from one until three p.m. I just wanted you to know.

Sincerely yours,

Director of Physical Education,
Varsity Basketball Coach.

FCA:AH

CHAMBER OF COMMERCE LAWRENCE, KANSAS

February 1, 1945

*****MEMBERSHIP LUNCHEON*****

* DATE: Tuesday, February 6th.
* TIME AND PLACE: 12:20 Noon, Eldridge Hotel.
* SPEAKER: Chet Brewer, Manhattan Business and Civic Leader.
* SUBJECT: "The Proposed Highway Program for Kansas."

Kansas with the second greatest road mileage of any state (Texas first) must revise our revenue plan if we are to develop the state with an adequate system of state, federal and farm to market roads. A carefully worked out program is now before the Legislature but it is very important that all citizens understand the plan. Leaders from several of our neighboring towns and counties are being invited.

Lawrence has a great deal at stake in this highway program. We are located on three important transcontinental federal highways, two state highways and a network of farm to market roads which must be rebuilt and properly maintained if our community is to prosper under our system of highly diversified agriculture. Chet Brewer is one of the best informed and aggressive men in Kansas on the subject of good roads. This matter is important to you.

Phone 485 for reservations by 5 P.M. Monday.

ACTIVITIES

Following is a brief report of recent activities of several committees together with some of the things planned.

AGRICULTURE - Kelvin Hoover, Chairman The Committee is working on a long range program of soil conservation, improved livestock production thru the use of better sires and feeding methods and improved local markets. The Committee is also vitally interested in a proposed marketing bill to go before this session of the Legislature establishing a Department of Markets within the State Board of Agriculture. It is believed that such a program is badly needed in Kansas and thru improved methods of grading, standardization and promotion, better markets and prices may be secured for Kansas farm products.

AVIATION - Glenn Charlton, Chairman This Committee has prepared and secured the approval of the City Council on a plan for consolidating the ownership and management of the Lawrence Municipal Airport under the direction of the University. The Committee feels that divided ownership of the land and improvements may prove to be a handicap in dealing with the federal government in the development of the airport. The recommended plan calls for expansion and new improvements. The program is now in the hands of the University authorities and the Board of Regents.

FLOOD CONTROL - For several months the Committee has aggressively been working with the various interests in the Lower Kaw Valley, the Blue River Valley, Greater Kansas City and the United States Army Engineers in a broad program designed to give flood protection to the Kaw Valley. Various plans are under consideration; some of them providing for navigation and possibly power, depending largely on the size and type of reservoirs to be built. While there are many factors to be considered and agreed on, everything indicates a determination on the part of those interested to unite on a program so that work may be started soon after the war. From the very beginning the only interest and activity of our committee has been flood control.

GOODWILL - The Rural Acquaintance Smoke established some years ago as an annual event to bring about better acquaintance, understanding and good fellowship between town and country will be held again this year, the date to be announced later - probably early in March. Last year the event was cancelled, largely because of the difficulty in getting food for the thousand to twelve hundred that may be expected. This year Joe and his committee say that it will be done somehow. May be short on food but long on entertainment and good fellowship.

HOUSING - This Committee in co-operation with Hercules Officials and others has been working for months to locate as many families as possible in Lawrence who are essential in the operation of the Sunflower Ordnance Works. Our duty is to help maintain production schedules on rocket powder and other explosives that are so badly needed on all fronts. The crying need is still for more houses and apartments. The Chamber Housing phone is 1004.

INDUSTRIAL PLANNING - The Committee has been negotiating with several industrial prospects and right now is trying hard to secure a suitable building to house the operations of one of the nations leading greeting card manufacturers. Recent advertising and publicity produced a great deal of interest on the part of Lawrence women and girls willing to work for this concern. Floor space requirements and other facilities are such that the Committee is having difficulty on location.

LEGISLATIVE - The No. 1 job of this Committee every two years is to assist in the matter of appropriations for the University. Because of transportation difficulties and other factors, it is not practical to invite the entire Legislature to visit the University as has been done in former years. Arrangements are now being completed for the Ways and Means Committees of the House and Senate to visit the University Tuesday Afternoon, February 13th; inspect the buildings, receive information as to needs; dinner at the University and attend the basketball game in the evening. The Chamber of Commerce has agreed to furnish the necessary transportation.

MEETINGS - Solon and his Committee deserve great credit for a splendid series of strong programs during the fall months. From now until hot weather when regular meetings will be discontinued, the Committee has some important meetings scheduled with top-notch speakers, all dealing with subjects of vital importance to this community.

MEMBERSHIP - Our hats off to Joe and his two team captains, J.G. Quigley, Ship and Mike, and to the hustling members of the Chairman two teams who brought in 50 new members during the recent snappy one-day campaign. Several more have been secured since the campaign ended. If you know of a good prospect, call the office, 485.

SPORTS - The Committee's most recent activity was in connection with the sale of tickets downtown to the football banquet last Friday night honoring the K.U. Team and given by the Athletic Department at the University. It is the intention to make this an annual event at which alumni, sports writers, faculty members, business and professional men of Lawrence and other friends of the University are given an opportunity to attend and honor the boys who fight for K.U.

TRANSPORTATION - The Committee deserves much credit, and the Santa Fe Trails Transportation Company our thanks, Joe Wilson, for installing the greatly improved bus service between Lawrence and Sunflower Ordnance Works. This improved service permits hundreds of residents in Sunflower Village and the barracks to take advantage of Lawrence shopping facilities, medical, dental, beauty shops, barber shops, garages and other services necessary to workers at the plant.

MANPOWER COMMITTEE - This Citizens Committee headed by Dean Stockton, Chairman and Riley Burcham, Co-Chairman has been a potent factor in stimulating employment and reducing terminations and absenteeism on the part of Lawrence residents working at Sunflower. Results of the Committee's efforts are now bearing fruit and should be an even more important factor in making us all conscious that our No. 1 production job here at home is Sunflower.

CIVIC ACTION COUNCIL - The Council got action on the first job Dr. F. C. Allen, Chairman it undertook: Securing the funds to employ full time Service Officer to coordinate activities and assist veterans of World War II with their rights and opportunities provided by the G. I. Bill of Rights. The Selective Service Board being designated to get the program underway in co-operation with the State Department on Veterans Administration and the Veterans Bureau of the Federal Government.

ADVERTISING AND SOLICITATION: In recent months we have noticed a marked let-down on the part of businessmen in supporting various advertising and solicitation schemes without first asking and demanding the approval of your secret committee on advertising and solicitation. This Committee has saved Lawrence business firms thousands of dollars by carefully analyzing and refusing to approve the scheme as presented. This is the way the plan works: Every request for advertising or solicitation not already on the approved list at the Chamber of Commerce Office, and without a letter over the signature of the secretary stating that the Committee has examined and approved the plan, should be referred to the Chamber of Commerce office for the proper procedure. This is for your protection and is an obligation on your part to co-operate with your fellow merchants in playing the game according to the rules.

COMMUNITY FOLDER Our supply of Lawrence folders is exhausted. A special Committee consisting of Armin Woestemeyer, chairman, Solon Ayers and Fred Ellsworth has been appointed by the President to be responsible for the publication of an attractive community folder at the earliest possible date.

COMMUNITY CALENDAR In recent months conflicts of important community activities have occurred. We do our best at the Chamber office to maintain a community calendar and if you believe this is important, will you please check with and register all important meetings and events at the Chamber office. This is for your protection and will help bring about better team work in the community.

February 9, 1945.

Mr. Orlis Cox,
Ottawa High School,
Ottawa, Kansas.

Dear Mr. Cox:

I have turned over your check and request for tickets for the Oklahoma game to Mr. E. L. Falkenstien, financial secretary of the Athletic Association. I am sure he will give you the best location he has, and will send the tickets to you today.

We will be glad to see you after the game.

Sincerely yours,

FCA:AH

Dr. F. C. Allen,
Director of Physical Ed.,
University of Kansas,
Lawrence, Kansas.

Dear Dr. Allen:

Thank you for your thoughtful letter of January 31. Mrs. Corder and I would have liked very much to have been at the Kansas State game but we had a high school game at home on the same night.

However, we were with you in thought every minute and I slipped away from the high school long enough to get to a radio to get the report on the K. U. game. I was very happy when I heard the announcer say that K. U. had pulled into a first place tie in the Big Six race by defeating Kansas State.

You and the boys are to be congratulated on the splendid performance you have shown. I knew the Kansas State game would be a thriller. Dean called me after the game and told me about it. He thought it was a great game.

We are planning to see the Oklahoma and Missouri games and here is wishing you and the boys the greatest luck in the world in these and the remaining games. Let's see Kansas win another Big Six Championship. I believe you will do it.

With the best of luck and success, I am

Sincerely yours,

Lee Corder

Mr. F. W. Crawford,
The Associated Press,
Kansas City, Mo.

Dear Mr. Crawford:

I had a mass of stuff on my desk, and regret that we did not get this out so that it could be mailed to you sooner. I expect you have already written your story, but I am sending this along in case you need it. I am sorry it has been delayed.

Sincerely yours,

FCA:AH
Eno.

Director of Physical Education,
Varsity Basketball Coach.

Dear Mr. Allen,

I had a letter from Wayne
the other day, with the wonderful
news that he had received
orders and would soon be
on his way home.

He wanted me to write
you, and have you start
sending the "Rebound" here.

He has enjoyed them so much,
and wants to stay on your
mailing list. Should you be
kind enough to send them to -

Wayne Glover, Jr. Lt. j.g.)
1446 W. 61st Ter.

K. C., Mo.

until he is reassigned and
can give you another address?

I have enjoyed the "Rebound"
as much as Wayne has. Before
he started receiving them from
you, I used to mail him copies
sent to me by my uncle, Claude
Chalpash. - I always read them
anxiously first.

I'm terribly excited about
Wayne's coming home. He hasn't
seen our little girl for over 2
years, and she is 4 now. They
will have a lot of catching up
to do - and according to her
there will be numerous trips
to the zoo! -

All of the best to you
and your family - and thanks
a lot.

As ever,
Diane Clover

July 28, 1945

July 31, 1945

Mrs. Diane Clover
6727 Colorado, R.R. 2
Overland Park, Kansas

Dear Mrs. Clover:

I am happy to acknowledge receipt of your good letter of the twenty-eighth instant, and I am changing the mailing address for Wayne to the following:

Wayne Clover, Jr., Lt. (j.g.)
1446 W. 61st Terrace
Kansas City, Missouri.

I started a Rebound on July 25, but my secretary's mother took ill and she is still out of town. I am hoping to get back to the Rebound business the latter part of this week, or certainly the first part of next week.

I did not know that Claude "Chuck" Chalfont was your uncle. I think he is a grand fellow.

We too are excited about Wayne's coming home. It certainly will be a grand homecoming with the baby now a young lady. My, what a time you will have. The days just won't be long enough!

Your letter arrived at the house and I opened it and read it to Mrs. Allen and Jane. Jane has a little Jill eight months old. She is quite a darling. Jane is living with us while her husband Elwood Mons is in the Pacific. Elwood is a Navy flier and we, along with you and 136,000,000 others, are pulling for a quick capitulation on the part of Japan.

It certainly will be swell to see Wayne. Tell him to list us in his itinerary when he is around these parts. With all good wishes to you, I am

Sincerely,

Forrest C. Allen
Director, Physical Education
Varsity Basketball Coach

Dr. H. C. Carlson,
University of Pittsburgh,
Pittsburgh, Pennsylvania.

Dear Dr. Carlson:

Glad to have your announcement on "Basketball Research in Fatigue". This certainly will be very interesting and I will be glad to see the book when it comes off the press early in March.

Believe me, I know that you did slave on the book. I have done some of that myself, and it is a real job.

I met one of your good Rotarian friends who thinks that H. C. and the family are great guys. It is J. A. Black from Wilmerding, Pa. We had a great time talking about the entire Carlson family. I served as president of Rotary here last year, and they are running me for governor of this district this year. Running may be the only thing I will do!

With all good wishes, I am

Sincerely yours,

THE NATIONAL ASSOCIATION OF BASKETBALL COACHES OF THE UNITED STATES

Dear Coach:

Last March 1944, the executive committee of the National Association of Basketball Coaches authorized and urged the brochure on "Basketball Research in Fatigue." This work had two purposes: 1. A factual presentation of the good in basketball and the answer to the criticism that it was bad for growing boys, 2. To further the prestige of the association by its research in the game. Money had been assigned to our organization for the purpose. The request for this paper was repeated during the summer.

The work and the number of people working, exceeded the original expectations. We tried to keep within thirty-two pages but the final book will contain fifty-six. George Edwards has done his usual fine work and I think you and the association will be proud of this basketball contribution. It was Ed Kelleher's suggestion that we have key men in every large center to see that the book fulfills its twofold purpose of serving basketball and our association. What about you?

The book will be off the press early in March. Will you help make it do its work and further its distribution? If you will tell us the sports writers, columnists, etc. who you will interview, we shall be glad to send you the number requested. We want the "moms" and "pops" to like our game and we think this book will help all forms of strenuous competitive athletics.

While the book is a free one to our association we have put a one dollar price on it. We would like for it to pay for itself and to that end we have had an additional 1500 printed. Believe me, we slaved on this book and our only compensation would be to see it serve basketball and the association and then have it pay for itself. We may be able to set up a fund to put out a similar book every year. When the time comes for extra copies, all checks should be made out to the association. Lend a hand!

I hope you will be able to help. Let me know as soon as possible.

Kindest personal regards and the best of luck.

Cordially,
H. C. Carlson, M. D.

Hiya
I hope you like the book
when it comes.
Yours
H.C.C.

MINUTES OF THE SPECIAL MEETING OF THE
BOARD OF DIRECTORS
LAWRENCE COMMUNITY CHEST
January 25, 1945
3:45 PM Chamber of Commerce

Mr. Lisle Eby, President, presiding with the following members of the Board present:

E. J. Coy	Mrs. Deal Six	Dr. F. C. Allen
Pearl Carpenter	Wealthy Babcock	W. T. Allen
Mrs. Caryl Dodds	R. S. Fox	A. E. Woestemeyer
A. W. Berger	George Lowman	John Brand
M. N. Penny	George Hedrick	

President Eby called the meeting to order and dispensed with the reading of the minutes and announced that this was a special meeting of the Board to take up a matter which it was thought should come before the Board prior to the annual meeting. Mr. Eby then called on Mr. John Brand to present the matter.

Mr. Brand stated that this special meeting of the Community Chest Board of Directors was called to consider a recommendation made the evening before at a meeting called by F. C. Allen and Cecil Hough, Chairman and Vice-Chairman of the Civic Action Council, which was attended by representatives of the Council, Community Chest Board of Directors and Budget Committee, Community Service League and other interested citizens of the community. This group met to consider the advisability and practicability of opening an office in Lawrence for the servicing and handling of discharged World War II Veterans. At the conclusion of the discussion, on motion by George Lowman, seconded by George Hedrick, the group decided to recommend to the Community Chest Board that some \$1800. be allocated from the National War Funds on hand; that this fund be placed at the disposal of the Selective Service Board of Douglas County to set up a service officer and pay expenses incidental thereto. It was thought that in the future a member agency to cover this need should be set up and formal application to the Community Chest Board made to raise funds to continue such office in the future.

Mr. Brand then moved that the Community Chest Board appropriate \$1800. from the National War Funds and that it be allocated to the Douglas County Selective Service Board for the purpose of employing a full time special service officer and paying the expenses incidental to the operation of the office, and that the money allocated be subject to the request of Ogden Jones, Chairman, and F. C. Allen, Secretary, of the Selective Service Board as needed by them. This motion was seconded by Mr. Penny and carried unanimously.

Mr. Brand then moved that the Board go on record of being everlastingly grateful to Mrs. Stockton and her committee for their administration of the Community Service League and that the President write her a letter of thanks. This motion was seconded by Dr. Allen and carried unanimously.

Mr. Woestemeyer stated that the Community Service League had been disbanded; there being no immediate need of the service performed by this organization, and that the balance of funds on hand would be returned to the Board as soon as the expenses were paid. Mr. Woestemeyer tendered to the Board the report and financial statement of the League and asked that they be received and filed. This was done and the original report and financial statement are attached to the official filed copy of these minutes.

Dr. Allen, seconded by Miss Carpenter, moved to adjourn the special meeting - carried unanimously.

MINUTES OF THE ANNUAL MEETING
LAWRENCE COMMUNITY CHEST
January 25, 1945 4:00 PM Chamber of Commerce

Lisle Eby, President, presiding with the following members present:

E. J. Coy	Mrs. Deal Six	M. N. Penny
Pearl Carpenter	Wealthy Babcock	W. T. Allen
Mrs. Caryl Dodds	R. S. Fox	A. E. Woestemeyer
A. W. Berger	George Lowman	John Brand
	George Hedrick	

Mr. Woestemeyer moved, seconded by Miss Carpenter, to dispense with the reading of the minutes - carried unanimously.

Mr. Coy, Treasurer, presented his report and moved that same be received and filed. This motion was seconded by Mr. Fox and carried unanimously. Copy of the Treasurer's report is attached hereto.

Mr. Fox, Chairman of the Budget and Finance Committee, presented his report and moved that same be accepted and filed. Mr. Lowman seconded this motion and it carried unanimously. Copy of the report is attached hereto.

The annual audit was the next item of business discussed. Mr. Brand moved that the President see that the audit is made; seconded by Mr. Lowman and carried unanimously.

Mr. Brand, Chairman of the Nominating Committee, presented his report in writing and moved that it be accepted. This was seconded by Mr. Woestemeyer and carried unanimously. The report, attached hereto, provides for the appointment to the Board of Mrs. George K. Melvin, Mr. Frank C. Whipple, Prof. E. C. Buehler and Mr. James H. Parsons for a three year term.

Mr. Lowman moved that we express appreciation and vote of thanks for the loyal and faithful service given the Chest in the past four years to the four retiring members of the Board, A. E. Woestemeyer, F. C. Allen, Mrs. Deal Six and John Brand. Mr. Fox seconded this motion and it carried unanimously.

There being no further business to come before the annual meeting, Mr. Fox moved, seconded by Mr. Penny, that the meeting adjourn - carried unanimously.

March 1, 1945.

Dr. R. I. Canuteson,
Watkins Memorial Hospital.

Dear Dr. Canuteson:

Thank you very much for your very generous gift to the Red Cross. Certainly you and I agree that no money that we give goes to the heart of our boys in the service when they are in real need more than this worth while donation.

When you get a letter from me to the members of the faculty please disregard it.

Sincerely yours,

FCA:AH

Chairman, K.U. Red Cross Drive.

February 16, 1945.

Mr. Hugh J. Cassidy,
1251 Jenkins,
University of Oklahoma,
Norman, Okla.

Dear Hugh:

It was very nice of you to write me as you did. I appreciate your compliment, and I enjoyed having a visit with you at Norman.

I have written a book entitled "Better Basketball", for coaches, players and spectators, which I think you would enjoy. In addition to fundamentals and techniques, there is an excellent chapter on the treatment of injuries, and in the back of the book a chapter on "Tales of Yesteryears" - seven stories of actual experiences with our teams.

For a boy who is interested in basketball as much as you are, I believe you would get a great deal out of the book. I am not trying to sell you one, but I did want you to know about it. The book sells for \$4.00. I would be happy to autograph a copy if you want to buy one.

Whenever I come to Norman I will be very happy to see you.

Very sincerely yours,

FCA:AH

Director of Physical Education,
Varsity Basketball Coach.

Feb. 12, 1945
Tues. Nite

Dear Dr. Allen,

I want to congratulate you on your outstanding victory. You probable don't remember me but, when you came down here and lost, I spoke to you after the game. You were kind enough to give me your autograph and tell me of your fine sons.

I made a promise there, if you beat O. U. at Kansas, I would write and tell you that you were the great coach, that I have ever met. Dr. Allen may ask one favor of you will you write and tell me anytime what it take to be a great coach.

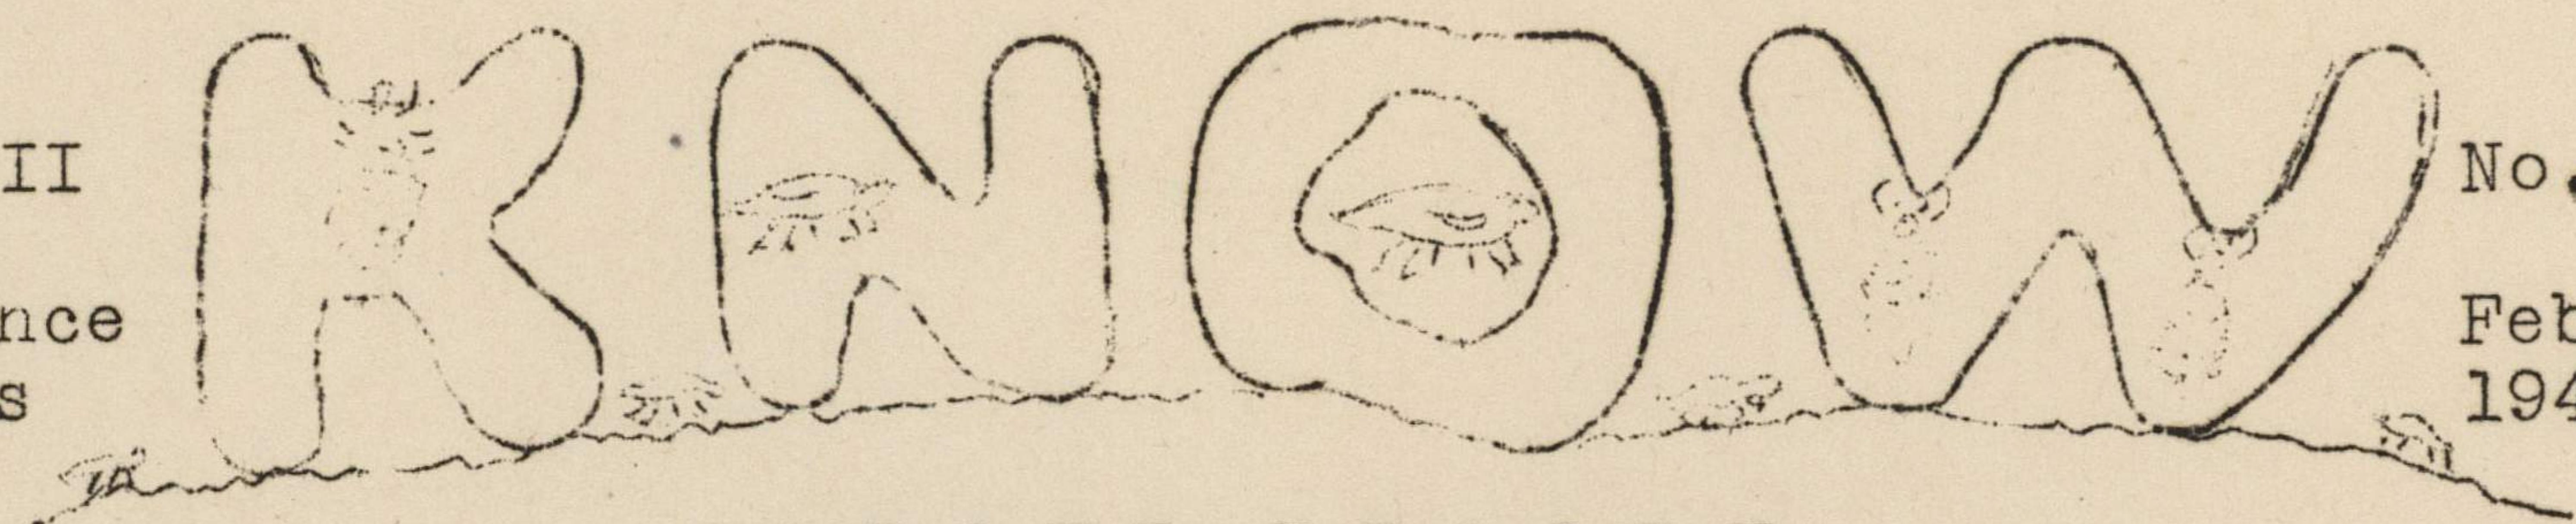

a friend
Hugh J. Cassidy
a student at the
U. of Okla.

P. S. may God bless your sons.

my address is

A B O U T H E A L T H

THE DOUGLAS COUNTY HEALTH UNIT, CITY Hall, Massachusetts Street, at 11th, functions daily from 8:00 A.M. to 5:00 P.M. Come in and tell us your troubles.

* * * * *

If two or more people wish to talk about something, they must have a common vocabulary, i.e. they must have some words that mean the same to each one in the group. To be sure, some thought transference can be had from the context, from tones, and from gestures, but the general truth remains undisputed, --they must have a vocabulary in common.

DIAGNOSIS

DIAGNOSIS is a formidable looking word and means by its etymology a "knowing through". A word often associated with it means a "knowing forward", i.e. a prognosis. If you do not know either now or subsequently, you are an "agnostic". Diagnosis has been defined as distinguishing a disease from its symptoms. A differential diagnosis distinguishes a disease from other diseases with which it might be confused, i.e. does this patient have typhlitis, perityphlitis, peritonitis, diverticulitis, or appendicitis, etc. Other adjectives are used, such as clinical, laboratory, X-Ray, physical, according to the place, means, or viewpoint of the making. An interesting variation is the negative diagnosis in which one seeks to render assurance that the patient does not have tuberculosis, lues, malaria, or what have you. Many people are more interested in knowing the names of their ailments than in doing something about them. It thus happens that some people refuse any treatment until a diagnosis is made and others stop treatment when it is made.

SURGICAL

SURGICAL abdomen is any condition of the abdomen requiring an operation. This diagnosis can often be made long before an accurate decision can be reached as to what, exactly, is the condition. Any penetrating wound of the abdomen demands opening and exploration, with, of course, doing what is indicated. A blow or kick or fall often causes a surgical abdomen and the sooner the operation is done the greater the probability of saving a life. Some acute and serious inflammation may develop and require operation. If in any doubt at all, call a surgeon and follow his advice.

SOME \$63.00 WORDS

SOME \$63.00 words. Please do not miss them. Do you know what phthriasis is? It is a synonym of pediculosis. Any one can have this fearsome sounding disease. As applied to one's person the correct common word is pediculosis (accent on lo) used as a noun, i.e. he has

pediculosis or phthiriiasis. As applied to his conduct or performance and as used in a strip 150 miles wide extending about from Kansas City to Denver, the word is pediculous, used as an adjective, i.e. he is pediculous. Everywhere else he is described as lousy.

The Pediculus copitis or head louse is more numerous here now than they (or it) has been for many years. Few, if any schools in the county are free of head lice.

An old time classification of insects was made by considering their wings, thus: ortho-, neuro-, lepido-, coleo-, followed by ptera described grasshoppers, beetles or what have you. In this scheme lice and bed bugs would be described as hemiptera i.e. having half wings or none at all.

Mr. Head Louse is not so large as Mrs. Head Louse--he being about one and a half millimeters long and she about two,--say 3/50 and 4/50 inches respectively. Since the actual size will be proportional to the cube of a dimension, his size will be to her size as 27 is to 64. So far as I know, they have no established plan for getting rid of unneeded males as the bees do. The female lays about 5 dozen eggs which stick to the hairs and are called nits. They hatch in about a week--maybe a little less. If numerous and neglected, they may cause an eczematous or pustular inflammation of the skin, especially about the border of the hair at the back of the neck. If neglected long enough the hairs may become stuck and entangled in the exudate thus forming a smelly mass of scabs with reenforcing hairs called plica polonica because it was common among the Jews in Poland.

We are not now seeing enough body lice or pubic lice to warrant any discussion of them.

How do you manage head lice infestations? There are many satisfactory ways, but they all require some interest, time, and attention. Cutting away most or all the hair is a great help. Rubbing the scalp with kerosene or turpentine daily or every other day for a week or so will finish the clean up. Burn or otherwise sterilize the combs, brushes, and clothing that have been in contact. Some people are sensitive to these oils and would blister. If the treatment causes seriously unpleasant stinging, neutralize the oil with some bland grease like lard or cooking oil and clean it all out with soap and hot water.

* * * * *

Several people have asked for a custom built article on colds. It is the intention to have such a discussion in the March number of KNOW.

For a long time, we have been beyond believing that mere cold causes a cold. It is interesting to know that colds are extremely rare in the cold regions of the north. However, there is probably some sort of more or less constant and causative relation between cold and colds.

Folk lore medicines says "Feed a cold". Think about this and review your observations and experiences with colds. This will make you a more intelligent reader for the March KNOW.

H. L. Chambers, M. D.

Proposed— Health Laws

*To Protect
Kansas Families*

“The health of the people is really

the foundation upon which their

happiness and all their powers as

a State depend.”

—*Disraeli.*

Public Health Is Purchasable

Within natural limitations; any community can determine its own death rate.

It is an established fact that the investment of a small portion of the tax dollar in adequate health protection services, provides for the people benefits that cannot be measured in dollars. Such an investment means: fewer cases of contagious disease; less suffering and crippling among children; fewer deaths and higher longevity rates; fewer deaths among mothers and infants; less time lost by industrial workers; school absences reduced and fewer defects found in school children.

The thrifty, progressive state does not overlook the constant losses that are occurring from preventable illness and deaths. A portion of the tax dollar is budgeted to provide an adequate health protection program, under the direction of trained health workers.

Therefore, consideration and active support is requested for proposed health laws, as outlined in this pamphlet.

F. C. BEELMAN, M. D., *Secretary*

KANSAS STATE BOARD OF HEALTH

PROPOSED HEALTH LEGISLATION,

1945

I. Premarital Examination Law:

Purpose: The outstanding public health problem we face today in Kansas is the relatively high incidence of venereal diseases. Syphilis, the killer and crippler of this group of diseases, not only is a serious menace to individual health, but to the basic structure of our civilization—the family. Syphilis destroys and cripples more Kansas' babies than any other disease. One way we can prevent the spread of this disease and stop its inroads into family life is by requiring blood tests on applicants for marriage certificates.

What the law would do: Under this bill both applicants for a marriage license would be required to present examination certificates showing that the ap-

plicants are not infected with syphilis in a communicable stage. Premarital blood tests would be made without charge by the State Board of Health or could be made by approved private laboratories.

II. Legislation to Control Cancer:

Purpose: Cancer, during the last ten years, has moved into and maintained consistently, second place as a cause of death in Kansas, taking an average of more than 2,000 lives each year. Much can be done to bring this disease under control. It is believed by authorities in cancer that approximately fifty per cent of all cancer deaths can be prevented. In Kansas this would mean an annual saving of more than a thousand lives each year. In the last twenty years cancer deaths have increased 63 per cent. We want to stop this rising trend and prevent needless suffering and death.

What the law would do: The proposed bill is an act to promote the prevention and cure of cancer; to authorize the State Board of Health to establish a Division of Cancer Control; to collect statistics on cancer; to develop necessary programs in order to reduce the morbidity and mortality from cancer; and to co-operate with interested agencies in the development and expansion of resources within the state, necessary to the prevention and cure of cancer. It also provides in Section IV that not more than \$15,000 per annum for the first biennium shall be appropriated for the purpose of carrying out the provisions of the Act.

III. Industrial Hygiene Legislation:

Purpose: For many years the State Board of Health has co-operated with industries, local labor groups and the State Labor Department, to a limited extent, in the elimination of industrial hazards. With industrial expansion in Kansas, requests for assistance by both management and labor have increased to the point where trained full-time personnel are needed to provide such services. Occupational health hazards have been the cause of a great loss in time and money to industry, labor, and the state through compensation claims. Approximately, half of our analyzations, up to the present time, have revealed that dangerous concentrations of hazardous substances existed in the various industrial processes in which samples were taken. In practically all cases, recommended preventive measures have eliminated or brought the existing hazard under control.

What the law would do: Establish within the State Board of Health a Division of Industrial Hygiene. It

further provides for personnel which would promote and carry out a state-wide program of industrial hygiene. A section of the bill provides for an appropriation of \$10,000 annually to carry out the provisions of the act.

IV. Legislation for Flour and Bread Enrichment:

Purpose: To provide for the public, in general, an additional source of vitamins and minerals essential for a good nutritional status. Applied to bread, "enriched" means white bread which, in addition to other nutrients present in ordinary bread, supplies definite amounts of iron, and of thiamine, riboflavin, and niacin (all three of which, are important members of the vitamin B complex). Enrichment is the practical application of nutrition knowledge to improve the general health of people.

What the law would do: This act, pertaining to public health, provides for the enrichment of flour and bread by the addition of certain vitamins and minerals; provides for regulations prescribing standards and methods of enrichment; and fixing penalties for violation of same.

V. Immunization and Vaccination Law:

Purpose: To wipe out diphtheria and smallpox in Kansas, as other states have done, by passage of a similar law. Every case of illness and death from these diseases is unnecessary. The threat of serious epidemics, always an existing hazard in an unprotected population, can be removed by vaccinating a large percentage of children against smallpox and immunizing them against diphtheria.

What the law would do: Require vaccination against smallpox in children attending public and private schools, day nurseries, and nursery schools; require immunization against diphtheria for all children less than twelve years of age entering such schools. The bill contains a waiver for those objecting because of religious beliefs and provides for reporting the immunity status of pupils by school authorities.

VI. Legislation to Safeguard Poisoning from Insecticides:

Purpose: There have been a number of needless deaths in Kansas from the accidental use of insecticides in foods. It is believed that mistaken identity, due largely to the physical properties of the poison resembling flour, can be eliminated by requiring the coloring of certain insecticides.

The law would provide for distinctive coloring of certain poisonous substances to identify them from food products and would provide for penalties for violation of the Act.

VII. Dental Hygiene Legislation:

Purpose: In Kansas not a single tax dollar is budgeted for the control of dental diseases, which attack 90 per cent of our children, causing pain, sickness, and crippling defects. Because of dental defects, one out of ten of our youth was found unfit for military service. The need for establishment of adequate programs necessary to prevent the wide-spread impairment of health caused by dental disease, is obvious.

What the law would do: Establish, within the Board of Health, a Division of Dental Hygiene for the promotion of a broad state-wide program leading to the early discovery and control of dental caries and other defects in the teeth and mouths of children during their growth period. A section of the Act also provides for an appropriation of \$15,000 to carry out provisions of the Act.

VIII. Food, Drug and Cosmetic Legislation:

Purpose: At present the state food and drug control work is carried on under laws nearly forty years old. The old laws were aimed at controlling adulteration and misbranding at the level of the local retailer. Preparation of food and drugs has long since passed from the local merchant to the large factory, and the retailer merely serves as a distributor. The purpose of this proposed bill is to provide adequate control measures for present conditions. In the past three years some fifty citizens of Kansas were injured by the use of hair lacquers, several were blinded by eyelash and hair dyes. The need for the control of dangerous cosmetics is apparent.

What the law would do: The proposed legislation would parallel the present Federal Food, Drug and Cosmetic Act and make it easy for persons in the state doing interstate business to comply with both the state and federal laws. It would permit action against violative products as well as against the person violating the law. It would prevent the sale of dangerous foods, drugs, cosmetics or therapeutic devices. Administration of food and drug control would be greatly facilitated.

IX. Legislation on Meat and Poultry:

Purpose: At present one of our largest food industries is in danger of losing one of its largest markets.

The city of New York will not permit the entry of uninspected eviscerated poultry, but has agreed to accept poultry inspected under a system similar to that which has been provided the meat industry in Kansas. Inspection is handled by a local veterinarian who works full time or part-time as may be necessary. Sanitation is also controlled rigidly. About 3,000,000 pounds of meat are produced in Kansas each month under this system.

What the law would do: The proposed bill would permit the board of health to contract with the poultry packers and intrastate meat packers and veterinarians to provide for the veterinary inspection of poultry and meats.

X. Hospital Legislation Endorsed.

Legislation now being prepared by the Kansas Hospital Association, and in which you should be interested, is the proposal to establish standards for general hospitals available to the public. Kansas, at the present time, has no standards regulating hospitals. Such a law would be beneficial both to hospitals and to the public. It would insure the best possible hospital service and facilities for community use and, in turn, would protect hospital areas from the small converted dwelling type of hospital, so inadequate and unprepared to give needed hospital services.

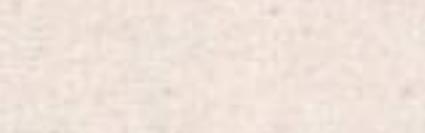

Request for Support of the Program

Although the health of the people of Kansas is the basic structure upon which their happiness and their social and economic development depend, legislative appropriations for the administration of a sound and comprehensive public health program have not been adequate. Health needs of the people, in order to decrease unnecessary sickness and deaths, should be seriously considered in the budgeting of the State's tax dollar.

The Kansas State Board of Health needs your support in providing those health measures so essential to your well being and that of your family. The legislator representing you in the 1945 legislative session will want to know how you feel about health matters.

THE KANSAS STATE BOARD OF HEALTH.

TEACHERS APPOINTMENT BUREAU

December 11, 1944

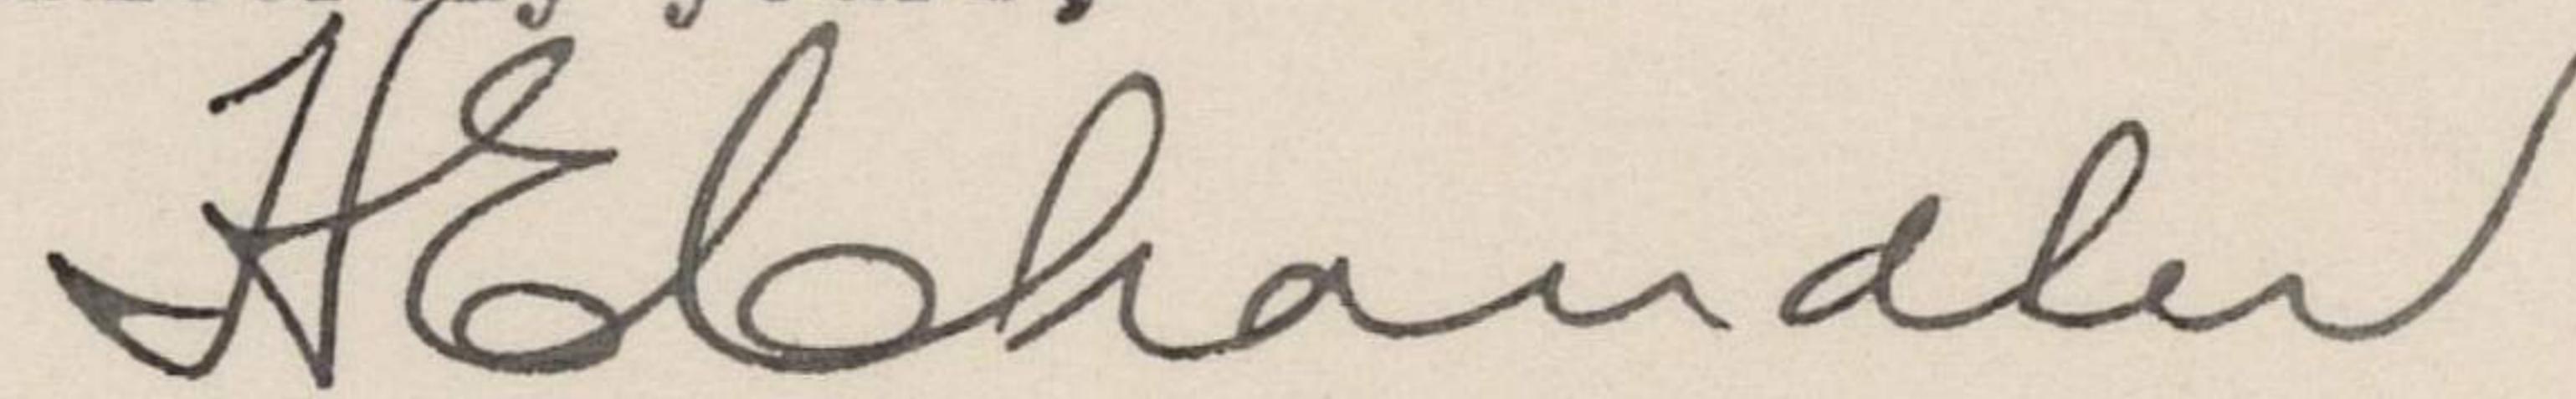

F. C. Allen, Head
Department of Physical Education
107 Robinson Gymnasium

Dear Mr. Allen:

During the past two weeks I have been contacting a number of high schools and have interviewed a number of seniors who are interested in college work. The three boys that I found at Lincoln will have to go into the army, but one of them at least would be able to get a start on college work before he is taken.

They would like to have catalogues and any special information which you can send them from the Department of Physical Education. A personal letter from you I am sure would be very much of an encouragement to them.

Sincerely yours,

HEC/jm
