Head of Industrial Arts Dept.
University of Kansas
Lawrence, Kansas

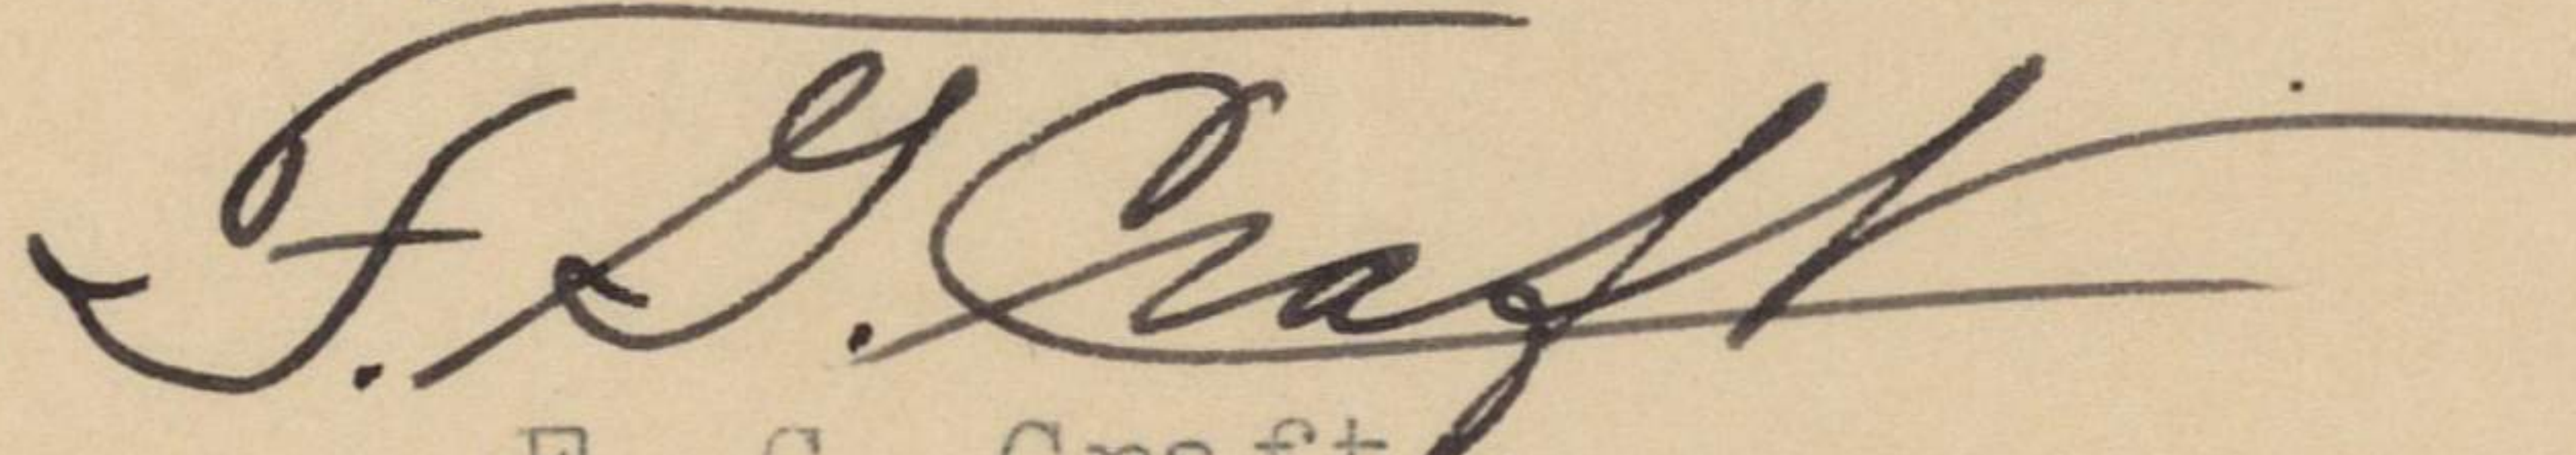

Dear Sir:

We are planning to construct some basketball back stops for our Auditorium and we desire to build them the best way possible.

We are wondering if you have some blue prints or sketches of a good type of construction to be used in building these. I should also like to have any suggestions for supports and braces to be used when these are installed.

We should appreciate your forwarding to us promptly any materials or suggestions that you may have. Thanking you I remain,

Very sincerely yours
