

THE CONLEY CLINICAL HOSPITAL

The Conley Clinical Hospital of the Kansas City College of Osteopathy and Surgery was established as a teaching hospital having a two-fold mission, service to worthy patients desirous of clinical benefits and better facilities for the training of our student doctors. While it is true that most of our clinical practise is collected from the residents of greater Kansas City, yet it is also true that these facilities need not be restricted to this particular geographic center.

There are deserving people throughout the states of Missouri and Kansas whom our friends in the osteopathic profession contact and to whom our clinical services and facilities--at our regular clinical prices--should be available.

To the end that our friends may be made better acquainted with our services and prices, we are publishing this bulletin.

Our regular charge for examination and diagnosis in the general clinic is only \$1.00. This includes necessary urinalysis and blood counts. The following tests are not included but are performed at the following additional rates:

Kahn Reaction - for suspected syphilis	\$1.00
All Blood Chemistry	1.50
Fecal Analysis	.50
Schilling Count	.50
Kidney Functional Test	1.00
Gastric Analysis	1.50
Basal Metabolism	2.00
Cultures	1.00

X-RAY FEES

Mastoids	\$4.00
Nasal Sinuses	4.00
