Dr. Forrest C. Allen
Director of Physical Education
Lawrence, Kansas.

Dear "Doc":

I have been planning on writing you ever since we landed, but I imagine you know how it is when one is on a trip and enjoying himself. Then I couldn't find out for sure about the subjects that I could take and I wanted to know that before I wrote.

My Aunt and I really had a very nice trip out. We came by way of the painted desert, petrified forest, and the mighty grand canyon. We took about five full days on the journey so that we could take in as many of the various spots of interest that we could find.

We really like it out here and so far we have not had any warm weather. Some of the Californians complain about it being hot, but I tell them they don't know what real hot weather is. I mentioned the Sunflower State for them to try.

H
Here is my schedule: "Problems in Curriculum Construction in Physical Education" by the well known Mr. LaPorte. I gave him your regards and he said, "he was very glad to hear from you". "Seminar in Health and Physical Education" by a Dr. Davis from Pennsylvania. I might say this Davis is really a smart man and I am sure you would like him. He has a wonderful personality. My other course is "United States Constitutional History", from Dr. Eriksson. He really knows his history, in fact, I am afraid he will find out that I know very little about history.

In my seminar course I am working out a problem on the "Analysis of Discipline in Secondary Schools in Physical Education. This will really be something-----??

I just wanted to drop you a line and let you know that I still existed and that I was thinking of you. Hoping you are having a nice and pleasant summer, I am

Very sincerely yours,

Maurice Cannady
