

words a certain man does not have to be a certain place or the ball in a certain spot before a try for basket is made

These set plays I mean are the ones of yours that appeared in "Scholastic Coach" that you were kind enough to send me.

Now on quick breaks and I imagine there will be plenty with the new center jump rule out. I wondered about timing and plays, and if you intended using these same set plays, with the screening the same as before. If (A) is to screen (B) man and the ball does not come to (B) at the time that it should should (A) continue on over to screen (B) man ~~when~~ when the ball does arrive, or turn and go back to the basket and try and recover the ball after (B) shoots. I hope I have made myself clear and not caused you a headache by trying to figure this out.
