A Message from

The Cramer Chemical Co. Gardner, Kansas

February 26,
1938

Dear "Phog":

Reference your letter of February 25, you may be sure that I will give you credit for being the Founder of the Kansas Relays. Do you realize that I haven't missed a Relay since they started and naturally I know the set-up better than probably anyone else. It would seem to me, that it is most unfair to take you out of this great classic since you are the one responsible for it being developed as it is.

I appreciate the situation over there, but I will certainly see that you get the mention as you rightly deserve it.

Very truly yours,

THE CRAMER CHEMICAL CO.
