Dr. F. C. Allen  
University of Kansas  
Lawrence, Kansas

Dear Dr. Allen:

What would you suggest that we use in our foot bath in our dressing rooms. We've been using a solution of chlorine but I've been hearing about powders that do the job just as well. The powder would be easier to handle if it were something that could be placed in a foot tub and the boy could dust his feet by standing in the powder.

I shall appreciate your suggestion. The fungus seems to be with us always so I guess we shall have to continue the treatment.

Sincerely,

  
R. L. Dennen.
