

The most cherished, the most valued, the most long rangedly important about these people is their health. The ten people of THE DOUGLAS COUNTY HEALTH UNIT are paid small salaries and charged with the promotion, preservation, and proper use of such health. This means an average \$25,000,000.00 respectfully for each of us".

5. The whole Unit went to Parsons to help the Unit there start off with their new building. We each learned something there and saw much to instruct and to encourage us. Some of us have gone several times to Topeka to programs of graduate instruction in the sort of work we are trying to do here. We hope to go for a day soon, to attend an institute covering several matters that are on the border between public health and social welfare. As you know, economic welfare, social welfare, and public health, are only separate pockets in the same garment and no is independent of the other two.

one

6. For more than two years we have been pushing for better laws on the dog situation. It recently came through, partly, I believe, because of the stimulus Miss Sheila Wilder, student councilman, acting for Councilman Ralph Pine, gave the idea. I suggest that we send her a congratulatory letter signed by our president and our secretary.

7. Arrangements have been made for a three and a half day chest X-Ray clinic to be held at the Community Building, beginning at 1:00 P.M. on May 23rd and continuing into Saturday May 26. Please give it all the publicity and support you can.

Respectfully submitted

H. L. Chambers, M.D.  
Director
