

June 30, 1944.

Professor A. W. Davidson,
Chemistry Department.

Dear Professor Davidson:

It was nice of you to write me as you did after the slight accident you had in backing out your car.

I took my car to the garage but they were not able to work on it at the time and instructed me to bring the car in and leave it sometime when I am in town over an hour. I will do so at my earliest convenience, and I trust that the damage will be very, very slight.

Sincerely yours,

Director of Physical Education,
Varsity Basketball Coach.
