

August 3, 1944.

Dr. A. J. Mix,
Huntsville, Ontario.

Dear Dr. Mix:

I have been endeavoring to have a meeting of the people on the Community Chest. I have talked to some individually but I think the only way we can get the job done is to get the group together early to give you a forecast of their reactions. This I hope to do next week, because during the following week I am to be at Boone, Iowa, and the next week I have similar work with the Kansas State High School Association at Topeka.

I will do everything I can in behalf of this project, but frankly I am afraid that the committee will shy from this large amount.

Very cordially yours,

Director of Physical Education,
Varsity Basketball Coach.
