

Dr. Allen ---

Dr. C. F. Nelson (Biochemistry Dept.) as Chairman of the Senate Committee on Committees, has your letter to the Chancellor in regard to a Senate committee on Physical Education. His committee must make a report to the Senate next Tuesday, and he would like to talk to you Monday at 2:30 about this new committee. His committee today (Fri.) met and will recommend that the Committee on Athletics be abolished and that a new committee - "Intramural Sports and Physical Welfare" (this is merely a suggested name) be set up with you as chairman. You should suggest the personnel of this committee, to be approved by the Committee on Committees, so that the whole new set-up can be presented in complete form to the Senate on Tuesday.
