

But getting back to the proposed Senate Committee on Physical Welfare and Recreation, there is so much wonderful work that could be done by this committee where the other benign and rather impotent committee has failed to function, that I feel we should no longer hold back many of the much-needed improvements here at the University. The topography of Mount Oread renders play space here practically nil. We are further behind in this feature at this University than most any University in the United States. By getting faculty members on this committee there would be a certain responsibility felt by this group and transmitted to others that would be very helpful.

So while I desire help from the outside group regarding a larger policy, I have not felt that this should be looked at as an offering of the department, but rather a thought springing from the department stimulating all groups in various schools to help toward a betterment of recreation poverty here on Mount Oread.

With appreciation, I am

Very sincerely yours,

Director of Physical Education,
Varsity Basketball Coach.
