

November 10, 1939.

Dean Paul B. Lawson,
College of Liberal Arts and Sciences.

Dear Dean Lawson:

It was mighty nice of you to write me inviting me to hear Dr. Otto Springer speak on "Germany in 1939". I want you to know that I attended and enjoyed the evening very much.

Regarding my University Club connections, I might state that I dropped out of a great many organizations at the time I was given the re-organization of the Physical Education Department. I felt that so many connections interfered with my giving one hundred per cent in work and energy to this department. Some time in the near future I am hoping to re-evaluate some of my former associations, and I plan to renew some of them.

I have very pleasant recollections of the time the University Club was built when Professor Boynton came to me for \$100 donation for building the club, and then six months later he came for another \$100. I was happy to make this contribution. For that reason I feel that I am not entirely unmindful of the support the University Club needs. I was a member from the time I came here in 1919 until two years ago.

With appreciation for your kindness in extending me the invitation, I am

Very sincerely yours,

Director of Physical Education and Recreation,
Varsity Basketball Coach.
