

July 15, 1943.

Mr. A. W. Livingston,
E. W. Bacharach & Co.,
Rialto Bldg.,
Kansas City, Mo.

Dear Mr. Livingston:

Thank you for your letter of July 10. The things that Mr. Branchfield stated he would have you write were not fulsome enough, in my opinion. But since we have a chart for swimming pool operation worked out for operators, I am sure that we will get along very satisfactorily.

I am asking a question. Galvanized bushings were used instead of brass, and there was no steel plate to bore through. I am wondering if there are any adjustments to be made.

Very cordially yours,

Director of Physical Education,
Varsity Basketball Coach.
