

3. New strainers also filter sand and gravel should be placed in the filter as the present strainers and sand and gravel are in very bad shape. In addition, before placing in the new strainers and sand and gravel, the inside of the filter should be brushed down by means of a wire brush or other suitable means for removing as much of the scale as possible. Also, the agitator on the present filter should be removed, at least that portion inside the filter.

4. A gauge should be installed on the in line to the filter and also a gauge on the outlet line from the filter, in order to tell the operator when it is time to wash the filter.

We believe that if the above recommendations are followed, good results would be obtained and the equipment would operate at high efficiency.

In the event we would be successful in securing the order for doing the above mentioned work, we would, for the lump sum price of Eight Hundred and Forty Seven Dollars (\$847.00), furnish and install all of the equipment and put the filter and recirculating system in first class operating condition.

Should you desire to go ahead with the work at this time, we could start possibly within two weeks time as one of our men would be available then. It would be necessary that we have a priority in order to purchase some of the equipment, especially the new recirculating pump and motor. Furthermore, in order to get the job done quickly, it would be necessary that you obtain, at least, an AA-3 priority as even with a higher rating than this it would require from 14 to 16 weeks to get shipment on the pump.

Very truly yours,

E. W. Bacharach & Company

(Signed) A. W. Livingston.

.....

The price for furnishing 100 strainers and 100 bushings would be \$44.00 f.o.b. Lawrence, and for furnishing the filter sand and gravel the price would be \$63.00 f.o.b. Lawrence. You will note in our letter of recommendation that we named a price of \$847.00. This, of course, is furnishing a complete job and the price named for the strainers, bushings, sand and gravel would be deducted from the \$847.00.

Very truly yours,

E. W. Bacharach & Company
