

~~practice~~ teaching and allow me to get my Master's Degree next summer provided I can work in a Chemistry course this winter. If I can't get a course at Western State Teacher's College in Kalamazoo that N.Y.U. will accept, I'll take a correspondence course then an exemption exam next June at N.Y.U. - That doesn't worry me now - Practice Teaching is my bug-a-boo.

We finally got our schedule worked out for the Senior High classes. We'll have every student from grade 5 on up at least once a week and a few so. high students twice a week. My schedule is light in comparison to the past 2 years in Salina.

I'm going out to the Kellogg Foundation Camp this eve & spend the week end. The camping program is to start next week. None of our students will go till 4 weeks from now. 2 other schools are participating so we must take our turns.

I haven't been busy this week at all for I had no classes except 2 on Mon P.M. and 3 yesterday. However, I'll go in full swing now. I hope the weather is nice. This week has been cold & rainy. Flies & mosquitoes have been almost unbearable.

I must close. I'll appreciate very much any statement you might send Mr. Tidrick in regards to my practice teaching. Thanking you kindly, I remain

Sincerely yours

Ruth Baker,

Lakeview Consolidated Schools
Battle Creek, Mich.
