Dr. Forrest C. Allen  
Director of Physical Education  
University of Kansas  
Lawrence, Kansas

Dear Dr. Allen;

We received your order for one pair of basketball glasses for Charles Walker for which we thank you.

We will await the arrival of prescription from Dr. Schrant of Hutchinson, and will then give them individual attention. The lens we use are heated to a certain temperature and then slowly cooled over a three day period, and have certainly been holding up well. We will hurry along these glasses after we receive the prescription, although a full week at least is needed to turn out a really dependable pair of lens.

I think Walker will get the best results just wearing the glasses normally as he would his reading glasses. That has been our experience to date, although some colleges have preferred to use two small pieces of tape over the temple. On my own players last year we wore them without additional fastening, and no amount of bad treatment or rough usage caused any trouble.

Sincerely yours,

*L E Means*
