Dean R. A. Schwegler  
School of Education  
University of Kansas

Dear Dean Schwegler:

I am very happy to have you call our attention to the wooden steps south of the Gymnasium building. I have spoken to Mr. Dell Davidson twice about repairing these steps and he does a pretty good job of it with the material that he has to work with. Personally, I have always thought that this was a matter the Buildings and Grounds Department were to keep up, but for years we have been doing this ourselves.

I am wondering if a letter from you to Mr. Bayles would not help the matter. Naturally the wooden lumber rots out and our budget does not permit spending the money necessary to install the proper steps for safety and looks that harmonize with the general University building upkeep.

I am sending you a carbon copy of a letter that I have written to Mr. Bayles and trust that you can augment my letter with a suggestion to him.

Sincerely yours,

FCA:lg
