

October 3, 1958.

Dean R. A. Schwegler,
School of Education.

Dear Dean Schwegler:

At a meeting of the Kansas Health and Physical Education Association Council held at McPherson, Kansas, this last Saturday, October 1, I found that the course "Personal Hygiene and Community Health", for 3 hours credit, is in conformity with our set up.

In regard to "Elementary School Playground Activities" I find that Kansas State College and the teachers colleges of Kansas are offering that as a 2-hour course. The representatives of the teachers colleges and the agricultural college were there and I checked with them very definitely on this matter.

I am wondering if you will check back with the state department and learn if this latter course is not a 2-hour offering. I would appreciate having this information prior to having our Physical Education faculty incorporate this course in the 60-hour program.

3 hr
course

Very cordially yours,

Director of Physical Education,
Varsity Basketball Coach.
