Don Cesar is a swanky club that has been taken over by the AAF as a hospital for psychoneurotics. They are doing a wonderful job and without the CO knowing that I was well acquainted with Swanson, he certainly wasted no words in commending the work that Swanson is doing!

You will perhaps also recall Hayden H. Donahue - tall thin Phi Delt who ran on the track team about 1935 or 36. He is a medic and asst. to Lt Col. Grinker, Chief Psychiatrist. Had a nice talk with him and will spend some time tomorrow. BS Med '39 MD '41 from Med. Coll. of Va.

I am just a little proud of the work that Swanson is doing but there are two things that disturb me. (There is always something that disturbs me).

In the first place the doctors here readily admit the importance of physical recreation (sports and games) as one of the important factors in the treatment of mental disorders. But perhaps none of our educators recognize the importance of these things as preventatives. I am not talking about the war situation, but the best academic training isn't worth a hoot if we continue to turn out neurotics. What I am trying to say in a clumsy way is what use have the cart before the horse.

Secondly regarding fellows like Swanson, it seems that our school system is slow to recognize quality and slower to pay for it. Here is a young fellow that has demonstrated unquestioned ability when given the opportunity and responsibility. The amount of good he is doing here can't
