Dr F. C. Allen
Near Phog

This is Saturday and quite busy but I am going to give you a rough drawing of the screen for the bay picking up balls.

Diameter large enough to cover shoulders and about 1" to spare on each side.

Straps exactly like suspenders. To hold 1/4 inch wire from head of person wearing screen. To be put on over head.

high enough to allow man to walk, coming down to about the knees.

The 1/4" galvanized screen is heavy enough to take the blow of a ball.
