Baseho, Kansas

Dear Dr. Allen:

It has been some time since I've seen you, but in this period I've also heard much about you and your foot traveling basketball team.

That game with Oklahoma must have been a thriller as it was very exciting as broadcast over the radio.

I've been in the hospital for seven weeks and am now at home under the doctor's care. I had a case of infectious mononucleosis which finally infected my heart.
