## THE UNIVERSITY OF KANSAS

DEPARTMENT OF APPLIED MECHANICS LAWRENCE, KANSAS

Memorandum for Dr.F.C.Allen, in re. Commencement Golf.

The committe agreed that it would be worth while to try to secure a team of alumni to compete with a team of seniors.

It was suggested that

(a) Fred Ellsworth write to the chairman of the various alumni groups, in the cities of Kansas and elsewhere, asking for a list of the golf playing alumni in the city and a statement as to their handicap in their local club. There was no thought of approaching them with regard to playing on an alumni team at commencement; merely get a list of names with each man's handicap.

(b) With the list in hand a study of the list could be made by the committee (Chiefly Glen on this) with a view

toward making a creditable match.

(c) The men selected for the alumni team were then to be high-pressured? into coming up for the day, Sat. June 10, to participate in the game. It would likely be necessary to select two or three times the number of men required for the team in order to get enough of them here to form a team.

(d) It was contemplated that the team should consist of men on each side.

It may be that instead of (a) above, the better plan would be for Dr.Allen to secure the names of the alumni chairmen from Fred Ellsworth and do all of the corresponding himself. The thought here is that Fred, not being a golfer, might not get it across to the chairmen exactly what we want; i.e. first, a list of the alumni in each town who play golf, and second, each man's handicap.
