

Montevideo, Uruguay  
October 27, 1941

My distinguished Dr. Allen:

Through information which I have received from the Fred Medart Manufacturing Co. we have learned of your new and original game "GOAL-HI".

We who are struggling to make effective the organization of the First Panamerican Congress of Physical Education are greatly interested in learning ideas and details concerning this matter from distinguished professional men and therefore I am going to permit myself to apply to you who are well known for your kindness, friendliness and expert authority to submit to us an article in which are expressed the importance and value the organization of a Panamerican Congress of Physical Education would have; how this program could be advanced; and the benefits that would be obtained for all these countries. This article which you send us will be published in the newspapers of Uruguay, Argentina, and Brazil. Copies will also be sent to other countries. We are convinced of the need of the cooperation of a person of your prestige to help establish the interest and atmosphere necessary to carry on this great movement in physical education.

Availing myself of this opportunity I am going to permit myself to ask you for details, pictures, and rules of your new game, "GOAL-HI", and also if you have material about basketball I shall be delighted to have it.

I have the pleasure of sending to you a copy of the minutes of the meeting in Buenos Aires, the seat of this movement and I beg you if you publish it with comments in your papers to send me clippings for our records.

Thanking you for the attention you pay to our requests I again express my kindest regards.

Raul V. Blanco
