

June 7, 1940

Mr. R. E. Weinzettel,  
Medart Manufacturing Co.,  
St. Louis, Missouri.

Dear Roy:

We are sending in a requisition for one Goal-Hi standard equipment for our summer recreation playground here. It may take a little while to get the requisition through, but it is on its way.

Roy, I am enclosing a letter from Dr. R. G. Clapp for your confidential inspection. I would not want you to write Dr. Clapp until he can reply to me giving permission, but I do want you to know that Dr. Clapp is a Yale University graduate, a man of very high educational qualifications and one of the most intelligent men that I know. He was pole vault champion at Yale in his undergraduate days.

You can see from my reply to his letter that I believe definitely that you people are doing the very best you can to keep the price at the minimum.

You spoke to me about having a cheaper Goal-Hi standard in the morgue and that you were hoping to bring it out sometime. Why would it not be a good idea to bring that single standard out soon - a standard that could be set in concrete? There are many people like Dr. Clapp who do not appreciate the cost involved in this fine piece of equipment.

With all good wishes, I am

Very sincerely yours,

Director of Physical Education and Recreation,  
Varsity Basketball Coach.
