

Mrs. Allen bought a home just six houses south of us in our block. She painted it and remodeled it, and has a lovely home there, and Milton and his wife and little red-haired two-year-old daughter moved in last week. So with three summer sessions and two regular academic years he will get his other degree and we hope he will branch out into even greater possibilities than we think he now has.

Bobby will be a senior in school next year. He will take his A. B. degree before he starts on his medicine, although most of the work he is now taking is pre-medicine work. And with Eleanor next year a sophomore we will have four youngsters in school.

So the goal that we work with may be called Goal-Hi, but it is a high goal of financial achievement that we will have to mount when we take care of the expenses of four youngsters in school. The Goal-Hi will take care of the "high goal".

Your explanation regarding the cheaper goal is entirely satisfactory to me. In fact, I quite concur in the findings that you have set forth, and if you never make a cheaper goal it will be agreeable to me.

Give my kindest regards to the office force and your good boss.

Very cordially yours,

Director of Physical Education and Recreation,  
Varsity Basketball Coach.
