OZARK BUILDING - KANSAS CITY, MO.  
VICTOR 4658

8/21-39

Dr. Forrest Allen,  
University of Kansas,  
Lawrence, Kansas.

My dear Phog: -

A number of days ago I addressed you relative to our coming back to Lawrence to finish up the Goal-Hi assignment.

As explained to you New York thinks we have a national story providing we would add several shots depicting kiddies playing the game, a battle between girls, it would be great to have a few feet of ten colored boys shooting at the goal.

These things must not be staged on your football field. We should set-up in some school yard or public park to round out a story that is well worth while.

It is essential that I have an immediate reply. In case you are not available, your assistant basketball instructor or coach can handle my request very efficiently. We have your close-up and do not need you if you are too busy to assist. The most important factor is time, New York would like for us to shoot Saturday of this week or Wednesday or Thursday of next week.

In closing we earnestly request your reaction or your reply from any one of your staff who can arrange the details requested above. Line up a bunch of kiddies and a location setting the time to shoot the first scene around ten thirty or eleven o'clock and both of us will profit by your arrangements.

Cordially,

*Billy Andlauer*  
Billy Andlauer.
