Goodfellow Field
San Angelo, Texas

12, Oct. '43

Dr. F. C. Allen
Director of Physical Education
University of Kansas
Lawrence, Kansas

Dear Dr. Allen:

I just received the last addition of the Jayhawk Rebounder, and as usual found a great deal of interest in it. This pamphlet of yours is the only contact with the school and the men I knew which I have, and you can imagine the pleasure it affords all of us who have known you and the University. Of course, those who are serving in the battle lines cherish their copies even more than we in this country do, but all the same I want you to know that I wouldn't want to miss my issue.

I have been here at the San Angelo Army Air Field since early in September, and enjoy the work here very much. My particular job at this time is as instructor in ground school, teaching weather to the cadets. It doesn't sound like much of a job when you think of what so many of the men are doing, but I guess some one has to lay the ground work, and I'm thankful I can do that much until such time as I'm needed in something bigger.

I was mighty glad to get the word that T.P. was o.k. and still in there pitching. He was a great guy, and the news is heartening.

I must close, but keep me on your mailing list and best wishes for continued success in your many endeavors.

Sincerely,

Bill

Bill Greene
