

said by him.

Ruth accompanied me down here. We were planning to visit some of the attractive places around here. But she became quite ill all at once. The Doctor didn't know what the trouble was but thought it was Typhus. There has been quite a wave of it around Panama City. She is feeling a good deal better now and should be able to get around in a few days.

The war seems to be going very good now. Let's hope that we aren't paying too heavy for the victories in lives lost. Perhaps this conflict will be over before too much longer. These boys overseas certainly must long to be home. I know I have almost an uncontrollable desire to get home and I've never been out of the states. I guess she been fighting the battle of the home front and have released a WAC for combat duty.

The news is quite limited from my end. So we'll be seeing you  
Sincerely  
"Doc" Gibbons
