

January 6, 1941

Dear Doctor Allen:

Since I plan to return to K. U. next semester to take mathematics required for my naval work it will be necessary for me to find work again. If you have any to offer I shall appreciate it.

I too should like to know in advance what you think of my going out for varsity - I know of course that there won't be any place for me in a playing capacity, however I should like to know what you think.

Lets see you beat them all.

Sincerely
Curwin
