Mr. Forrest C. Allen,
Director of Physical Education,
University of Kansas,
Lawrence, Kansas.

Dear Sir,

We are glad to send you an "All-Blue" Protex support, Outsize Small, for testing.

Indications now are that we will complete arrangements for the manufacture of Protex supports in the U.S. within the next few months. At that time, we will advise you where they can be obtained.

In the meantime we shall be glad to have your candid comment as to how you like this sample support in comparison with other types you have used.

Constructive criticism is welcomed. We shall await your comment with interest.

Yours very truly,

W/-

Sales Dep't

P.S. For Swimming - Shorten understraps by pinning, if necessary. The easy-stretch elastic used, which is an essential factor in preventing chafing, lengthens with the weight of the water absorbed. At toilet, it is only necessary to remove the parts from the pouch - unnecessary to lower the waistband.
