

Salina, Kansas
July 23, 1938

Dr F. J. Allen:
Kansas University
Lawrence, Kansas.

Dear Sir:

Mr Oswald Tower advised me to write to you to obtain approval on an idea that I have.

The idea is making a channel net from the basket-ball goal ring leading to the out of bounds line beneath the basket, forcing the ball to go out of bounds beneath the basket ready for play. It will check play quickly and distinctly leaving the ball ready for play.

I have enclosed a stuffed envelope, hoping you will answer me soon.

Yours Very Truly
Theodore Gagnon
