

Life Insurance

On Mount Oread there are many hazards which confront the people who attend or visit the University. Let's do away with these hazards and in so doing insure our lives with more safety on Mount Oread.

First I think we should make a list of these hazardous obstacles. Then draw up a plan of disposing of these hazards and then go to work getting rid of them.

Hazards that I recognize as such on Mount Oread are as follows: icy streets, walks, and approaches to buildings, these should be cleared or covered with cinders or salt. Speed limits are not enforced and should be. Place stop signs at intersections and stop this foolish riding on the outside of cars.
