

exciting news to write home
about. I am now instructing
my third class of cadets.
I still like my work fairly
well and I do enjoy working
with the cadets and trying
to teach them the difference
between an airplane and
a tractor! One of my boys
complained because the
throttle on the airplane
worked just backwards
to the one on his Dad's
tractor!

I have been following
your games quite closely
and wishing you luck all
the time. Sparky McSpadden
