U. S. ARMY AIR FORCES

Dear "Doc",

I was just transferred here from Texas to learn how to fly B-24's, and my first day on the field, I ran into Ed Seagee, neither of us having seen the other since Mt Oread days back in '41. Of course the conversation drifted — I mean ran headlong — to K. U., and he showed me a copy of your "Rebounds", which (little) Bill Greene, who was a ground school instructor of Ed's in basic flight training, had given him. I found so many interesting items and familiar names that, Sr., I wonder if I could be put on the mailing list; realizing I'm not a K-man, I hope the time I spent in the intramural office might qualify me.

I've seen a few old K. U. boys since I got in the army. Saw Bob Hagen & Herb Curran, both Army pilots, down in Florida over a year ago. Also Chet Gibson & Chet Friedland down there at the same time.

A little personal history: Got my commission the Signal Corps in Feb. '43, & transferred to pilot training last Sept., getting my wings just this May!

The "Oskaloosa Red-dog", Red Thompson is with an air corps outfit in Eng now. Heard Maj. Elbel was back in Lawrence on a visit last week.

My regards to you and Mrs. Allen, Joe, and thanks for any copies of "Rebonds" that you can spare.

Sincerely,

Lee Suddleston

P.S. My address is "50D, LAAF, Liberal, Kans.", but due to the quick changes of the army, you'd better send my copy to Oskaloosa, Ks.

Dear Doc:

I haven't acknowledged receipt of your April Rebaunds, but that doesn't mean I didn't appreciate my copy.

Congratulations! They get better each copy. I was especially interested in the stories concerning the awards presented to K. U. boys for their bravery. K. U. has sent a lot of men to serve the country, and I'll bet that a very very high percentage are doing better than average. That's the way you and others at K. U. have taught us. Do a better than average job.

We have a former Lawrence man here now. His present name is Wichita. His name is Harold Leiscott. He is the man from whom Wayne Ellphie bought his business some years back. It is nice to have a Kansan working with me.

I'll be looking forward to another Rebaund soon.

A B O U T H E A L T H

THE DOUGLAS COUNTY HEALTH UNIT, City Hall, Massachusetts Street, at 11th, functions daily from 8:00 A. M. to 5:00 P. M. Come in and tell us your troubles.

SOMETHING TO THINK ABOUT

AGRICULTURE last year employed 16% of the nations workers, but had 24% of the fatal accidents. Of all forms of accidents 40% were in homes, 28% involved machinery, 26% live stock, 10% falls, 9% heat, 6% lightning, and all others 20%. Here is a situation and a matter where "taking thought" can make a whale of an improvement.

PNEUMONIA

PNEUMONIA (four syllables please) was known to Hippocrates and the old Greek physicians, but they made it include what we now call pleurisy-- i.e. they did not distinguish between inflammations of the body of the lung and those of its surface or the lining of the chest wall. Aretaeus made a description of it that has been a classic for near two thousand years: "Ruddy in countenance, but especially the cheeks; the whites of the eyes bright and fatty; the point of the nose flat; the veins in the temples and neck distended; loss of appetite; pulse, at first, large, empty, very frequent, as if forcibly accelerated; heat, indeed, externally feeble, and more humid than natural, but internally, dry and very hot, by means of which the breath is hot; there is thirst, dryness of the tongue, desire of cold air, aberration of mind; cough mostly dry but if anything be brought up, it is a frothy phlegm or slightly tinged with bile, or with a very florid tinge of blood. The blood stained is, of all others, the worst".

Formerly, it was taught that all pneumonia, both lobar and bronchial, was caused by the pneumococcus. We now recognize several other agents-- notably streptococcus and virus. About three times as many males as females have it. In the United States it is more fatal in negroes than in whites. Those exposed to cold and hardships are more susceptible. Immigrants and new comers are less so than natives--in the literature. It renews or relapses more than any other acute disease.

It occurs in all climates and in all seasons, but is more frequent in winter and spring. And the incidence is greater in cities.

Nearly every one carries the infectious agent all the time so that when some other trouble strikes him he may develop a pneumonia. This fact

is involved in the rule that people with broken hips usually die within ten days or get well.

About a generation ago, we began putting pneumonias into types and at that time recognized types I., II., III., and put all others into type IV. Now, more than thirty types are recognized and for nearly all of them is developed a specific serum which is definitely curative. The relatively recent development of the sulfa drugs has made it possible to manage a pneumonia with comparative certainty and the use of the matched serum gives it precision never before attained. Probably the ideal thing is to use both the synthetic drugs and the biologic balancer.

The difficulty about this comes out of the fact that the sulfa drug must be used early to get the most good from it and the specific serum cannot be selected from the group until the case has developed far enough to type. Each case thus presents a problem peculiar to itself, i.e. the patient, his friends and his physician must decide which they will give him, a sulfa drug treatment and maybe have him practically recovered before he could be typed and by this treatment make typing difficult or impossible, or should they wait for time to type and so get the double assurance of applying both treatments or antidotes.

There are various stations where the most approved material for the most advanced treatment of pneumonia are kept and renewed and brought to date as indicated. The Lawrence Memorial Hospital is one of them. Its laboratory and its laboratory technicians have been investigated and approved by competent authority. Its supply of the assortment of specific type serums is adequate, its drug supply is correct and there is enough of it, and probably most important of all, its spirit is co-operative.

If the doctor sends the pneumonia patient to the hospital, they find there everything in readiness to do all that present day medicine knows to do on such situations. If for any reason, the patient remains in his home, the hospital will send a technician, armed with suitable apparatus to collect specimens of blood, urine, sputum, etc. for making the necessary laboratory studies.

I suggest that you give this whole matter careful consideration, so that if the horrible hypothesis becomes a tragically pressing reality, you can do what there is to do without needless delay or loss of time.

Under the new treatments described above and partly because of them along with the development of other favorable influences the mortality in pneumonia has improved from about 1 in 4 to about 1 in 35. However, the record for Douglas County for 1943 shows 63 cases of all forms of pneumonia with 16 deaths. This does not mean that this county is especially bad about pneumonia--rather, it means that only fatal cases were well reported. At that we are not so bad--one solid Kansas county reported for 1942 it had enough deaths from pneumonia to allow two deaths for each reported case with a 3% excess left over.

H. L. Chambers, Director
Douglas County Health Unit

Ens. R. E. Hunt,
Area C - 6,
Camp Peary,
Williamsburg, Virginia.

Dear Bob:

We were delighted to hear from you, and glad to have your new address for our Jayhawk Rebounds mailing list. We'll be getting another letter out in about a month, I hope.

Bob and Jean are very happy in their home in Philadelphia. Bob will be in the University of Kansas Hospital in Rosedale sometime in September for his internship, so we will have opportunity to see them occasionally.

Things are moving along smoothly here, with the summer semester in full swing. The Navy V-12 unit will doubtless be decreased at the end of this semester, in late October. We are expecting approximately 125 ASTP trainees in August, and this will probably be the last group assigned here.

With best wishes and kindest regards to you and Mrs. Hunt, I am

Sincerely yours,

Director of Physical Education,
Varsity Basketball Coach.

June 29, 1944.
Thurs. 1430

Dear Dr. Allen,

I wish to let you know that I'm no longer at Norfolk. I received my commission as an Ensign April 29 and was ordered to Camp Peary, at Williamsburg, Virginia for temporary active duty with the Recruit Training Command. For six weeks I was

Battalion Commander in charge of 1200 recruits in training here. At the present I am Bond Officer in this area for the 5th War Loan. This morning one man bought \$25,000 in bonds from me, so we should make our quota easily.

I wrote Bob after I heard of his marriage - but haven't received a reply. Glad to hear he's getting along so well at Pennsylvania.

Please send your fine Newsletter to my new address here. I shall inform you of any change in address if shipped out.

I believe I told you we are to have an addition to the family next month. My wife is in Kansas. Needless to say I'm thrilled about the whole affair. Most sincerely,
Bob Hunt.

Elkhart, Indiana

Miss Edna Hills,
Department of Home Economics,
University of Kansas.

Dear Miss Hill:

I am returning the clipping which you kindly loaned me several weeks ago. Thank you very much.

We have had a conference with Mr. Simons and I believe he is friendly to the program in general. I have asked Miss Evans to endeavor to straighten Mr. Simons out on what he thought was excessive cost per child in the nursery school.

Mrs. Tom Jones made a wonderful impression upon Mr. Simons when I had him down at the nursery. She did a real sales job, and a high class one, too.

Sincerely yours,

Director of Physical Education,
Varsity Basketball Coach.

Mr. Gerald Hesse,
Lawrence Paper Company,
Lawrence, Kansas.

Dear Gerald:

My son-in-law, Lieut. Elwood Mons, navy flier, and our daughter, Jane, are coming to Lawrence Saturday on a five-day furlough. Since they will be here only a few short days I am going to beg off the dinner date for the Rotary Assembly, and will try to get out to the Country Club before 9 o'clock.

I trust that you will excuse me for my partial absence under these conditions.

I endeavored to call you today, but learned that you are out of town ~~until~~ Saturday, so I thought I should drop you this short note.

Rotarily yours,

Director of Physical Education,
Varsity Basketball Coach.

Supt. Harold A. Hoeglund,
1811 Mitchell St.,
Humboldt, Tennessee.

Dear Superintendent Hoeglund:

Manpower is so short around the University of Kansas now that I have not been able to find anyone who would be interested in coaching in Ketchikan.

You are doing a wonderful job up there. Mr. C. B. Black, of Black & Veatch, tells me about basketball development in Alaska, and how splendidly you are going forward with fine new gymnasiums. Congratulations and best wishes. We hope after the war that we may be able to furnish you some competent help in the way of basketball coaching material.

Very sincerely yours, .

Director of Physical Education,
Varsity Basketball Coach.

U. S. NAVY

April 19
Wednesday.

Dear Doc:

Have a few minutes so thought I'd take pen in hand and scribble off a few lines to you.

From all my observations so far, the Armed Guard duty is going to be mighty fine duty. We have been taking training ships out into the Gulf of Mexico on firing practice, which up to now, constitutes my sea duty. I shouldn't be too eager as there will be plenty of sea duty forthcoming very shortly.

When I report to New Orleans on June 1st I will be assigned a ship or transferred to San Francisco and assigned one there. My duties will be an Armed Guard Commander with a crew of 28 men to man the guns. The Armed Guard Commander is the Navy representative aboard the merchant vessel and is responsible for its defense. The locality of

where you are to make port will determine whether there will ^{be} any depending to do. Time will tell about this.

So far I've enjoyed every bit of my training here and am looking forward to seeing some of this old world. Like I've always said "If the Navy assigns me a job I'll do my best but I don't volunteer for anything" that's somewhat of a saying in the Navy. "never volunteer for anything, keep your eyes open and salute the commanding officer and you will get along fine."

After 23 months time in I think it's just about the truest saying anyone could ask for.

Tell Dean Nesmith that I'll drop him a line in a day or two. He helped me out with a bad back ache when I was home but since I've been here I've had trouble with it again. Wish I could find some one with his magic touch to fix me up.

Will close now & will be looking forward to getting the Jayhawk Rebounds again
As ever

July 17, 1944.

To Whom It May Concern:

I am very happy to certify that Mrs. L. O. Hanson (nee Lois Laptad) has had courses in our Department of Physical Education at the University of Kansas which have fully covered the subject of "effects of narcotics".

Mrs. Hanson took her minor in Physical Education, and was enrolled in many courses taught by Dr. James Naismith. These courses included Kinesiology, Personal Hygiene, Physical Examination and Prescription of Exercise, as well as the regular University course in Physiology. Dr. Naismith was very thorough in handling his subject matter, and I am sure his lectures covered the effects of narcotics. I was a member of the department at that time, and closely associated with Dr. Naismith.

Sincerely yours,

Director of Physical Education,
Varsity Basketball Coach.
